

## Midway

### PLANNING COMMISSION MEETING STAFF REPORT

**DATE OF MEETING:** June 14, 2022

**NAME OF APPLICANT:** Midway City

**AGENDA ITEM:** Code Text Amendment of Section 16.5.2, 16.13.10, and 12.11.020

#### **ITEM: 2**

Stuart Waldrip, representative for the Midway Arts Center Foundation, is proposing an amendment to section 16.5.2: Permitted and Conditional Uses (Commercial C-2 and C-3 Zones) to add indoor performing arts centers as a conditional use in the C-2 zone. He is also proposing an amendment to section 16.13.10: Maximum Height Provisions for all Buildings, and section 12.11.020: Exceptions, to include indoor performing arts centers in the list of structures that are allowed to exceed stated height requirements.

#### **BACKGROUND:**

This item was continued from the May 10, 2022, Planning Commission meeting with the following motion:

**Motion:** Commissioner Simons: I make a motion that we recommend continue for an amendment to section 16.5.2: Permitted and Conditional Uses (Commercial C-2 and C-3 Zones) to add indoor performing arts centers as a conditional use in the C-2 zone. He is also proposing an amendment to section 16.13.10: Maximum Height Provisions for all Buildings, and section 12.11.020: Exceptions, to include indoor performing arts centers in the list of structures that are allowed to exceed stated height requirements. Accept the staff findings. With the Height and setback defined, new resolution regarding the parking, traffic impact to be more relevant to this project, understanding the funding and timeline and extend the street level rendering to include more of the view of main street and the current businesses.

**Seconded:** Commissioner Garland

**Chairman Nicholas:** Any discussion on the motion?

**Chairman Nicholas:** All in favor.

**Ayes:** Commissioners: Lineback, Cliften, Garland, Simons, and Osborne

**Nays:** None

**Motion:** Passed

The motion that was approved by the Planning Commission gave the applicant direction on a several items that needed to be addressed. The applicant has supplied more information which is attached to this report. These items include the following:

- Height and setback defined
- New resolution regarding the parking
- Traffic impact to be more relevant to this project
- Understanding the funding and timeline
- Extend the street level rendering to include more of the view of Main Street and the current businesses

Below are staff's comment's on how the applicant addressed each issue:

*Height and setback defined* – The applicant has provided some information that is attached to this report regarding height and views of Mount Timpanogos from Main Street. Staff has reviewed the code height restrictions that would be allowed if the proposed amendment is approved, and the following is analysis of the required front setback for a performing arts center. The current height limitation of 35' for the roof and 52.5' for any allowed architectural elements. The proposed amendment would allow for a performing arts center to increase in height if setbacks are increased on a ratio of 1:1. For example, if the tower on a performing arts center reached 70' then the required front setback would be 25.5', instead of the required 10' front setback. This is based on the maximum height of the structure is 35' (52.5' for architectural elements). With the increased height of 70', the building would need to be setback an additional 17.5' from the original 10' setback for a total of 27.5'. If the tower were 75' tall then the front setback would need to be 32.5'.

*New resolution regarding the parking* – The applicant has provided three different parking plans. The first is a shared parking plan with Millstream Properties which owns the parking lots to the east and to the south of the proposed performing arts center. This option does not have support from Millstream Properties based on the public comments made from a representative of Millstream Properties. The second is a plan where all the parking is contained on the performing arts center property. This plan could work if it has the proper access. Again, a representative of Millstream Properties stated that shared access has not been agreed to. If the performing arts property is not able to use Millstream Properties' access, then the performing arts center will need to find its own access. It may be possible to access on the west side of the performing arts center property, but UDOT will need to approve the proposed access. The third option to have some parking on the performing arts center property but to also have 60 stalls on the Olde

Swiss Square property located to the west. Any off-site parking agreement will need to be approved by the City Council.

*Traffic impact to be more relevant to this project* – The applicant has supplied some traffic studies that are attached to this report. One of the studies is for The Village development. This is a development located to the northeast of the proposed performing art center site. It does give information about current traffic, but it is not specific to the proposed site, nor does it appear to contain a performing arts center in the study. The second study is specific to a performing arts center and does give information on the traffic impact of the proposed use. One of the main concerns with traffic is the constant impact traffic will have on Midway streets. While its true that there have been many years of performances that have generated peak traffic counts on Midway streets, those performances have been limited to about 30 days a year. If a performing arts center is approved then, according to the applicants, there will be 200+ days of active use.

*Understanding the funding and timeline* – The applicant has supplied more information on their proposed timeline (please see attached). There are many factors that can come into play regarding proposed timelines. The main worry that has been identified is that a building is not completed and is left in an unfinished state on Main Street. The applicants have stated that construction will not begin until all the required funds are committed. This is helpful but there could still be flaws with this proposed scenario, especially if committed funds are never paid.

*Extend the street level rendering to include more of the view of Main Street and the current businesses* – The applicant has provided some drawings that help visually show the impact of a performing arts center on Main Street (please see attached).

Below is the original staff report from the May 10, 2022, Planning commission meeting:

The applicant, representing the Midway Arts Center Foundation, is proposing two general amendments to the Midway municipal code. One amendment to title 16, would add indoor performing arts centers as a conditional use in the C-2 zone, the other amendments would adjust similar sections in 16.13.10 and 12.11.020 that provide exceptions to the maximum height requirements for specific types of buildings. These adjustments are being requested by the Midway Arts Center Foundation as they hope to propose an indoor performing arts center (not to exceed 50,000SF per the proposed code text amendment) at approximately 330 East Main Street. The 1.6-acre site where they are proposing the facility is zoned C-2, which currently does not allow for the proposed use. It is important to note that the proposed amendment would allow performing arts centers in all of the C-2 zone, not only the aforementioned site of which, in this report, is included site specific information. Additionally, the structure that is being proposed would protrude above the allowable height limits for the structure. The C-2 zone has a 35' height limit for all structures which is measured as the vertical distance from natural grade to the highest point of the roof. To allow for unusual conditions or appurtenances some exceptions are allowed. One such exception is for church spires, bell towers, finials,

and like architectural features which are allowed to extend above the 35' maximum height by up to 50 percent (52 feet 6 inches for a 35-foot building). The proposed performing arts center does include a clock tower which would allow for the increased height limit for the architectural feature. The proposed code text amendment would also allow a performing arts center an increased height limit measured from natural grade to the roof. Currently public buildings and churches may be erected to any height provided the building is set back from required building setback lines a distance of at least 1 foot for each additional foot of building height above the maximum height permitted. The applicant is proposing to include performing arts centers on the short list of structures with special maximum height restrictions.

#### ANALYSIS:

Code text amendments fall under the category of a legislative action. Therefore, the City Council has broad discretion regarding the petition. It can be approved or denied based on the discretion of the City Council members. There is no obligation by the City to approve the proposals. If the City Council feels that the proposal will contribute to the community and will help promote the goals and policies of the General Plan, then the proposals should be considered. The City Council may consider any issue, included in the staff report or not, as a discussion item. Also, the City may require items from the petitioner that normally would not be allowed if a developer's property were properly located in a zone that allowed for the proposed use.

In reviewing the proposed code text amendment, staff reviews the Midway General Plan to see whether the proposed amendment helps accomplish its goals and policies. In 2016/2017, the current General Plan was revised and adopted. There does appear support in the General Plan for a performing arts center. Some support includes the following sections of the General Plan:

#### Community Vision Goals and Guidelines

Guideline 1: Provide recreational and cultural opportunities that would be of interest to the full range of age groups.

Guideline 4: Encourage all types of visual and performing arts.

#### Main Street

Main Street is the economic, architectural, and historical heart of the community. The most powerful and lasting image associated with Midway is Main Street. This commercial core should be developed as a distinctive shopping and business area emphasizing it as an attractive location for tourism tied to **Midway being a meeting place and staging area for festivals, special events, celebrations and a variety of community activities which will indeed produce a vibrant healthy community centerpiece**. Midway's Swiss theme and architectural design standards are prominent and important elements of Main Street.

## Economic Goals and Guidelines

Guideline 3: Pursue arts, activities, recreation opportunities, and land uses that will create an experience to attract tourists.

Regarding the proposed amendment to the height restriction provisions that would allow a performing arts center to exceed the current height limitation of 35' for the roof and 52.5' for any allowed architectural elements, support from the General Plan is more difficult to identify. One possible section that would support the proposed amendment is found in the Main Street section of the General Plan which states the following:

Main Street Element page 61:

Design – Using proper design standards such as setbacks, storefronts size and placement will improve the overall appearance and walkability.

The proposed structure is larger than most structures that are currently located along Main Street and without an amendment to the height restriction, the design for a performing arts center without the added architectural element of a clock tower might not have a good proportional design.

The other side of the issue to consider is viewshed. If the structure is allowed a greater height than the current code allows there will be an impact to the surrounding neighboring properties and from Main Street for pedestrians and from vehicles. In this case, a better architectural design and proportions will lead to the loss of views from the surrounding area.

Elements of the Community Vision:

Effective planning through clustering, setbacks, Transfer Development Rights and animal/agriculture ordinances will help Midway to preserve its view corridors, maintain open spaces and reinforce a country/rural feeling.

Midway's historical preservation Master Plan will identify the specific structures the City would like to preserve/restore, the view corridors it would like to preserve and the elements of the pioneer heritage it would like to maintain.

As mentioned earlier, a code text amendment is a legislative action and therefore, the City Council has broad discretion. The City Council may consider all issues when considering the proposal. Other items the City Council may want to consider include traffic impact, parking, economic and tourism impact, visual impact, site feasibility, project feasibility, and long-term feasibility.

Traffic Impact – Staff requested a traffic impact analysis (see attached) which was submitted with the application. Based on only one theater being used at a time, the maximum number of patrons is 450 which would generate 180 trips. The model assumes 2.5 people per vehicle. Actors, stagehands, and staff would total approximately 50 people

and would generate 50 trips. The total of all trips generated per event would be a maximum of 225 trips.

Parking – The current code includes a parking requirement for theaters which requires one parking space per four people based on the design. Based on a maximum of 500 people maximum per performance (450 patrons and 50 actors, stagehands, and staff) a total of 125 stalls would be required. Two options have been presented. The first is an option that shares parking with the Millstream Properties. The City Council may approve a combined parking agreement between two adjoining property owners if they find the proposed agreement is acceptable. Staff wants to emphasize that any agreement that is approved by the City Council should be in perpetuity. Staff's concern is that if the agreement expires and is not renewed, then the theater would be severely under parked. The parking needs to be a permanent solution. Option two would provide all the parking on-site but some of the parking would be located under the theater. When considering other land use applications that have proposed below grade parking, the City has had concerns that Midway's generally high-water table could be an issue with below grade parking.

Economic and Tourism Impact – A performing arts center would be an economic generator that would draw in patrons and tourists which in turn would spend money in Midway at restaurants, shops, short-term lodging facilities, and gas stations. It seems likely that those businesses would benefit if a performing arts center were built. Midway would also receive the tax benefit from the increased activity.

Visual Impact – A performing arts center would be a large building on Main Street. If the building is designed appropriately; it could be a flagship building that helps enhance the Swiss and old European architecture that is so important to Midway. A large building, especially with an increased maximum height, would also impact views from surrounding properties.

Site Feasibility – Staff has asked the applicant for a geotechnical report specific to the proposed site of the performing arts center to help determine if the site is feasible for the proposed use and structure. A report has not yet been submitted to staff.

Project Feasibility – The applicant has submitted information regarding fundraising to gather the needed funds to purchase and develop the property. It is unknown how likely it will be to gather the roughly 45 million dollars required to complete the project. The City must consider the possibility that, if approved, the building might only be partially completed and the potential problems that would arise from such a scenario. Though unlikely, it is also important to consider the possibility of an abandoned large building on Main Street.

Long-Term Feasibility – The applicant has submitted some information on long-term feasibility that would include maintenance, management, etc. They plan to establish a four-million-dollar endowment fund that will provide approximately \$200,000 each year for facility upkeep and to lower rental costs for local arts groups.

## **POSSIBLE FINDINGS:**

- The proposed amendments, if approved, are not limited to the applicant's proposed site but would be a possibility for the entire C-2 zone
- The proposed amendments are a legislative action, and the City Council has broad discretion on whether to approve the amendments
- Promotes the goals and objectives of the General Plan which includes encouraging all types of visual and performing arts
- Could help generate economic activity for other Midway businesses and will help expand the tax base for Midway
- If the height limit is expanded for a performing arts center, views from surrounding properties will be impacted
- A traffic study has been submitted
- A geotechnical report has not been submitted

## **ALTERNATIVE ACTIONS:**

1. Recommendation of Approval. This action can be taken if the Planning Commission finds that the proposed language is an acceptable amendment to the City's Municipal Code.
  - a. Accept staff report
  - b. List accepted findings
2. Continuance. This action can be taken if the Planning Commission would like to continue exploring potential options for the amendment.
  - a. Accept staff report
  - b. List accepted findings
  - c. Reasons for continuance
    - i. Unresolved issues that must be addressed
  - d. Date when the item will be heard again
3. Recommendation of Denial. This action can be taken if the Planning Commission finds that the proposed amendment is not an acceptable revision to the City's Municipal Code.
  - a. Accept staff report
  - b. List accepted findings
  - c. Reasons for denial

## PROPOSED CODE LANGUAGE AMENDMENTS

**Proposed changes in bold red text**

### **1. USES IN THE C-2 AND C-3 ZONES**

To be Added to Section 16.5.2 - Permitted and Conditional Uses:

USES	C-2	C-3
<b>Indoor Performing Arts Centers (up to 50,000 sq. ft.) with largest audience venue up to 500 seats, primarily for live performances</b>	<b>C</b>	<b>N</b>

### **2. SUPPLEMENTARY REQUIREMENTS IN ZONES**

#### **Section 16.13.10 Maximum Height Provisions for all Buildings**

The height of any building shall not exceed 35 feet. The total height shall be measured as the vertical distance from the natural grade, as defined in this Title, to the highest point of a roof. To allow for unusual conditions or appurtenances the following exceptions apply:

- A. Antennas, chimneys, flues, vents, or similar structures may extend up to 5 feet above the specified maximum height limit.
- B. Water towers and mechanical equipment may extend up to 5 feet above the specified maximum height limit.
- C. Church spires, bell towers, finials, and like architectural features as well as flag poles, may extend above the specified maximum height limit by up to 50 percent of the height limit (52 feet 6 inches for a 35-foot building), but shall not contain any habitable spaces above the maximum height.
- D. The height of buildings in Resort Zones may exceed 35 feet if all the requirements of the Recreational Resort Chapter of this Title are satisfied.
- E. Public buildings, **indoor performing arts centers**, and churches may be erected to any height provided the building is set back from required building setback lines a distance of at least 1 foot for each additional foot of building height above the maximum height permitted.
- F. Special height requirements for some buildings on benches and slopes greater than 10 percent are imposed by the Sensitive Lands Chapter of this Title. These restrictions on building height shall be applied where applicable.

### **3. BUILDING CODE PROVISIONS**

#### **Section 12.11.020 Exceptions**

To allow for unusual conditions or appurtenances, the following exceptions shall apply:

- A. Antennas, chimneys, flues, vents, or similar structures may extend up to five feet above the specified minimum height limit.
- B. Water towers and mechanical equipment may extend up to five feet above the specified maximum height limit.
- C. Church spires, bell towers, finials and turrets, as well as flag poles, may extend above the specified maximum height limit by up to 50 percent of the height limit, but shall not contain any habitable spaces above the maximum height.
- D. Public buildings, **indoor performing arts centers**, and churches may be erected to any height provided the building is set back from the required building setback lines a distance of at least one foot for each additional foot of building height above the maximum height permitted.

## **EXECUTIVE SUMMARY**

- **History**

The pioneers and their leaders greatly prized cultural and performing arts. From Lethe Tatge to Midway's Social Hall (now the Cannery), to the lovely classical architecture of the early buildings, the history of Midway is intertwined with cultural and performing arts.

"Theaters" were historically a conditional use in the commercial zones of Midway. Only very recently was that use inadvertently deleted in a failed restructuring of the commercial zones. The MAC cannot go forward as planned without restoring a concise, targeted conditional use for this type of indoor performing arts center, as proposed.

The Mayor, with concurrence from all 5 Council members, has recently written a letter of support for the general concept of a performing arts center in our city. It is attached for ease of reference.

- **Reason 1 for the Changes - C-2 Zone Use**

Midway's General Plan has always encouraged preservation of culture, history, and family-friendly activities, such as those that will be a part of the MAC.

**General Plan, Community Vision, Goal 3:**

"Guideline 1: Provide recreational and cultural opportunities that would be of interest to the full range of age groups."  
 "Guideline 4: Encourage all types of visual and performing arts."

The MAC, with its family-oriented and broad programs for youth and adults in the performing arts, together with displays of visual arts, will go a long way toward accomplishment of this goal.

**General Plan, Main Street:**

"[A]n attractive location for tourism tied to Midway being a meeting place and staging area for festivals, special events, celebrations and a variety of community

activities which will indeed produce a vibrant healthy community centerpiece. Midway's Swiss theme and architectural design standards are prominent and important elements of Main Street."

"well suited for the Main Street core area: . . . Entertainment and cultural venues"

### **General Plan, Economic Goals**

"Guideline 3: Pursue arts, activities, recreation opportunities and land uses that will create an experience to attract tourists"

....  
"Guideline 12: Promote events in the City to attract tourism"

The elegant design of the MAC honors and preserves the historic architectural theme of Midway. It will attract thousands of cultural tourists, who will contribute substantially to the success of local businesses and produce much-needed sales tax revenues. It fits nicely in the surrounding commercial neighborhood. The MAC is a perfect example of a use that was contemplated by the framers of the General Plan.

- **REASON 2 FOR THE CHANGES - Architectural Feature**

#### **Current Height Limitation Scheme**

Occupied space is strictly limited to 35 feet. Architectural features may generally extend another 17.5 feet, but may not be occupied. Public buildings and churches may extend those limitations another 1 foot for every foot of set-back beyond the minimum.

#### **Proposed Addition of Performing Arts Centers**

The Swiss-inspired tower of the MAC, as proposed, extends beyond the 17.5-foot limitation. However, like a church or public building, to which it is very similar, the tower looks elegant and appropriate, in keeping with the Swiss/European theme of Midway. The MAC is set back sufficiently from the required distances to allow for the tower as designed, provided that the Code clarifies that indoor performing arts centers are included in the public building/churches concept.

Without this language inclusion, the tower will not have an elegant Swiss look and will not be in keeping with Midway's architectural theme. The cut-down tower will look mundane and stubby on such a beautiful structure. There is no precedential danger, as it is extremely unlikely that Midway will ever have another new indoor performing arts center.

**To the Respected members of Midway's Planning Commission and City Council:**

You preside over the crossroads of the cultural heritage and future of our community. Your vision and courage are key to the success of this effort to grow the cultural climate that has been an integral part of our City since the Midway Social Hall was built in 1875. Your decision will affect the lives of thousands of Midway residents and their friends, now and far into the future. Hundreds of supporters are anxiously awaiting your decision and your leadership in this effort. We respectfully request that Midway City move confidently into the future and **"Bring the MAC to Midway"!**

## CODE CHANGE AMENDMENT

### History:

“Theaters” were historically a conditional use in the commercial zones of Midway. Only very recently was that use inadvertently deleted in a failed restructuring of the commercial zones. Recently, the City Council has asked for a more restrictive term than “theaters” as a potential use in the commercial zones. The proposed narrow description of “indoor performing arts centers,” addresses that legitimate concern on the part of the City Council.

### Midway’s General Plan

Adding the restricted term as carefully described in the proposed Code language will enable the City to comply with the provisions below in Midway’s General Plan, without opening the door to unacceptable uses. It is clear that the General Plan contemplates appropriate performing arts in Midway.

#### Community Vision, Goal 3:

Guideline 1: Provide recreation and cultural opportunities that would be of interest to the full range of age groups.

Guideline 4: Encourage all types of visual and performing arts.”

#### General Plan: Main Street:

“An attractive location for tourism tied to Midway being a meeting place and staging area for festivals, special events, celebrations and a variety of community activities which will indeed produce a vibrant healthy community centerpiece.”

The MAC meets both of those standards.

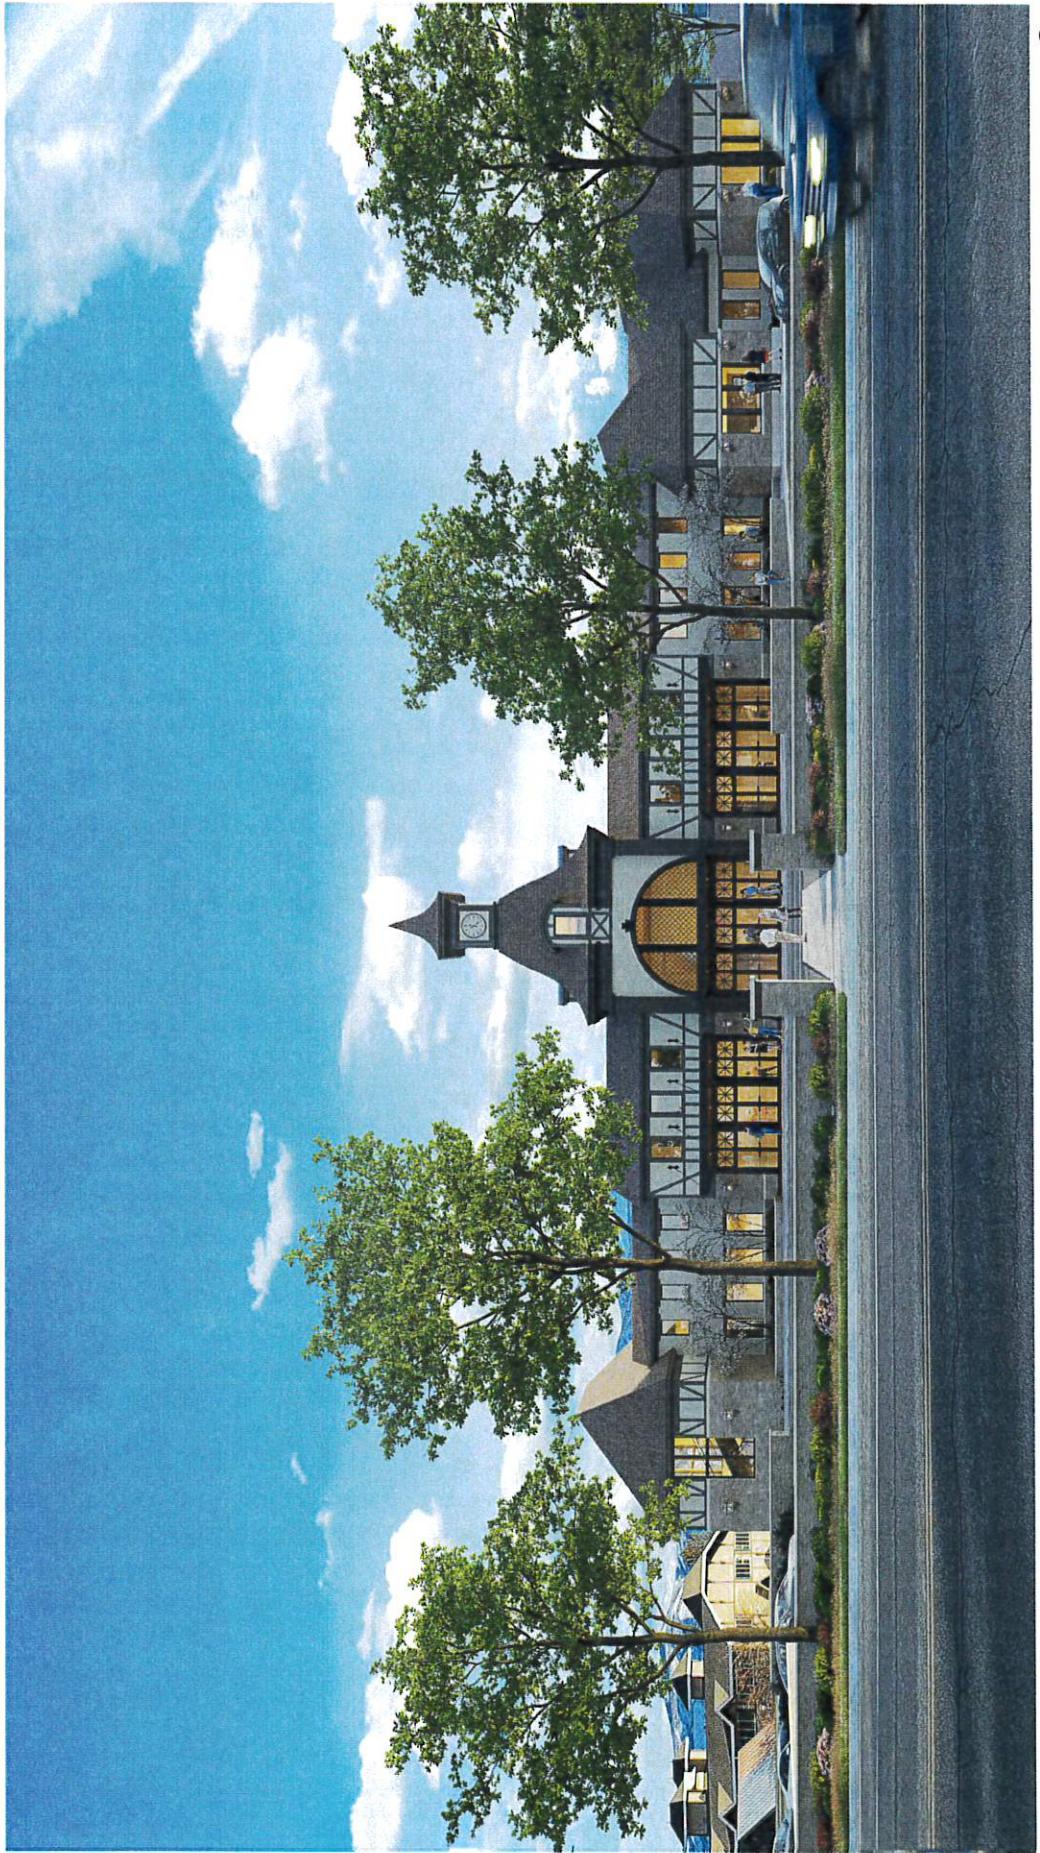

### Midway’s Cultural History

The original settlers of this area greatly prized the performing arts. As early as 1875, Midway’s Social Hall (now the Cannery) provided a venue for a variety of cultural events, including theater and even opera.

### Code Change Considerations

Code change language must be as specific as possible to assure that the “indoor performing arts center” proposed for Midway will coincide with the cultural and social needs of residents. This proposed Code change will allow the arts to continue the theatrical tradition begun nearly 150 years ago.

## Front View

## Option 1 - Shared Parking - More Landscaping

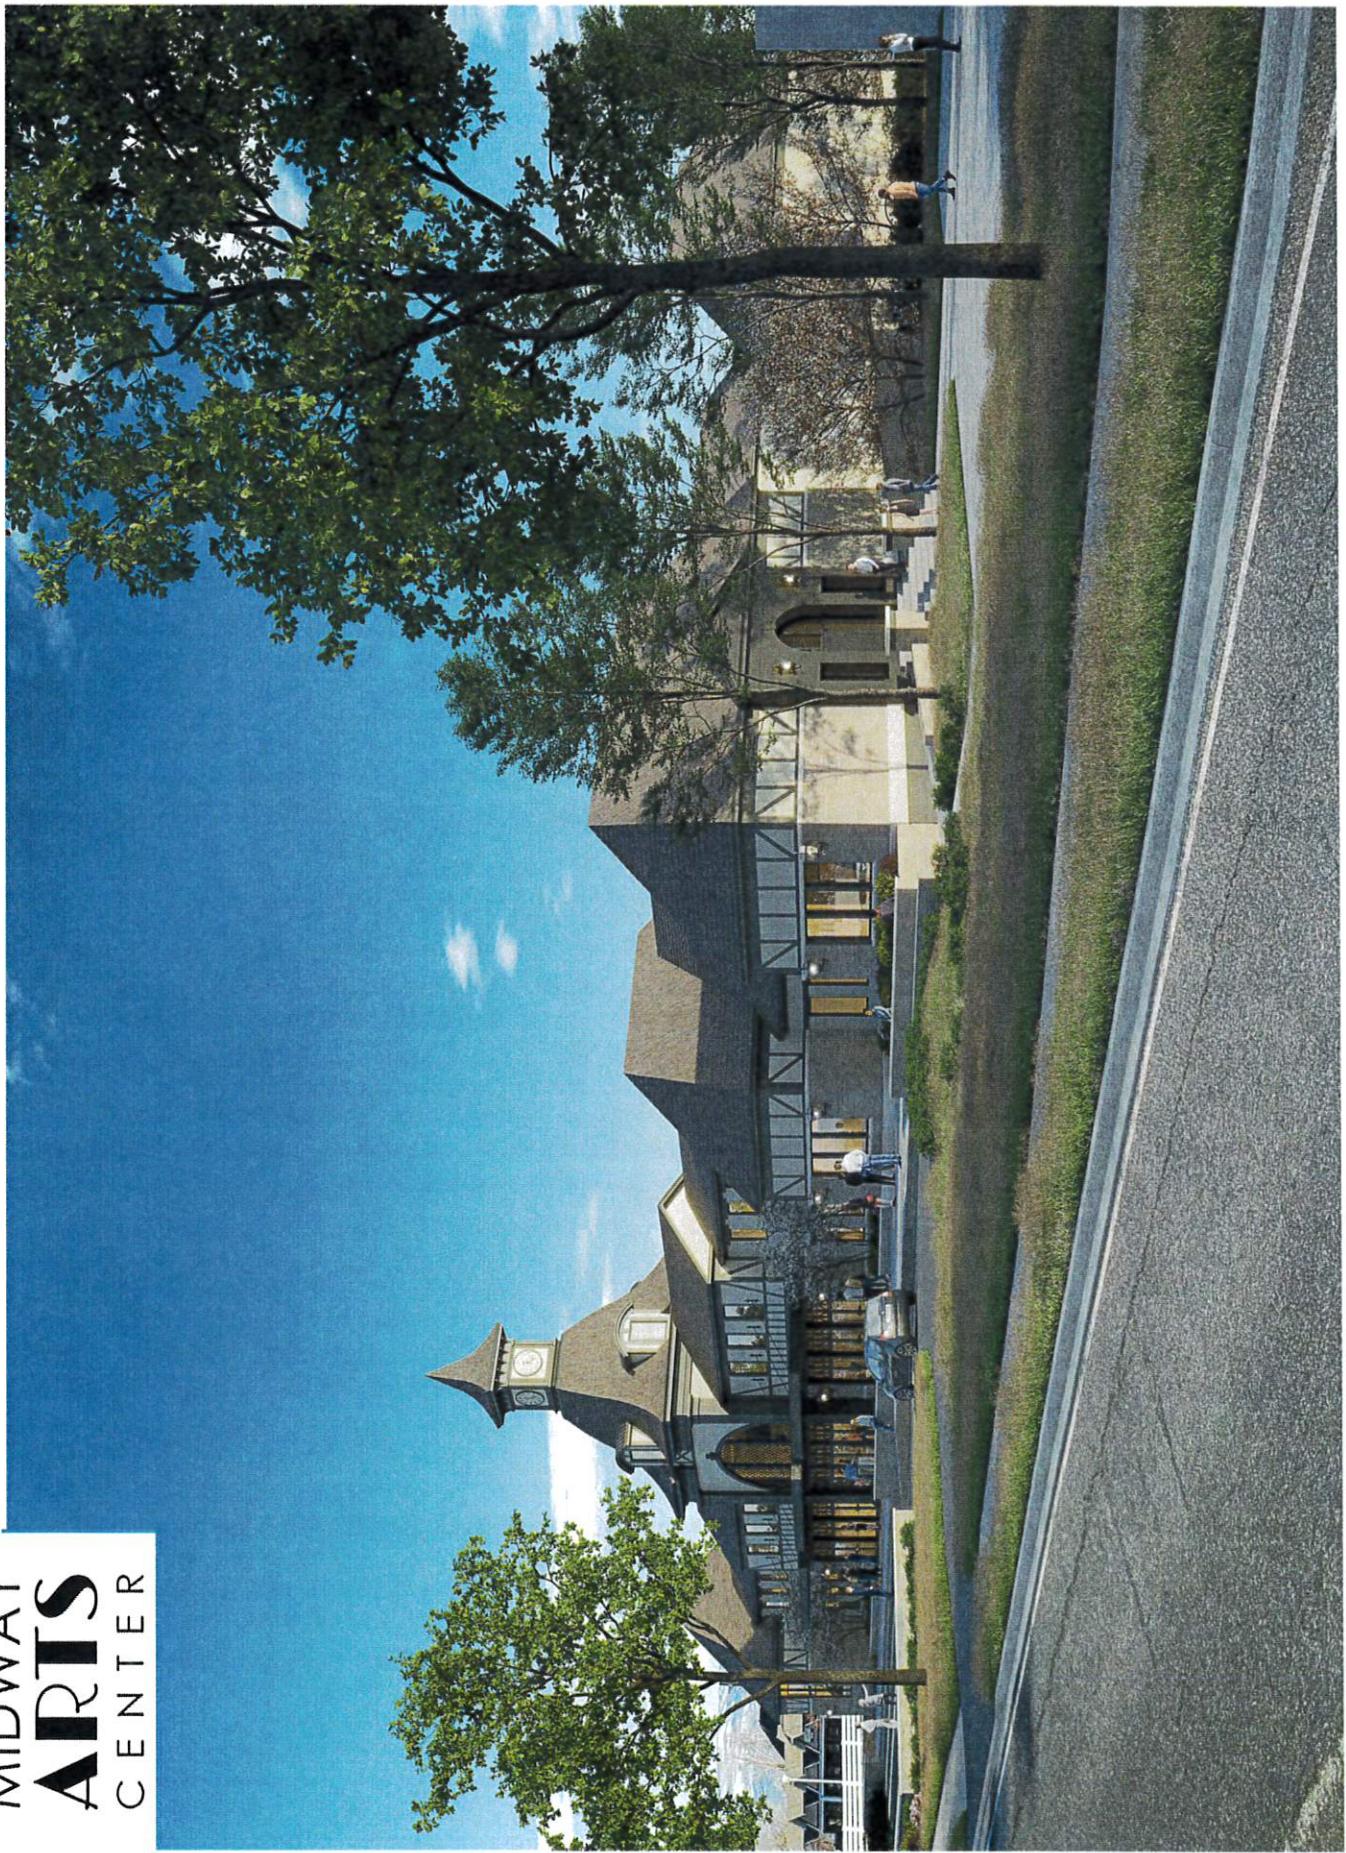

## Option 2 - Onsite Parking - Less Landscaping

## Option 1 - Shared Parking - More Landscaping

16

16

## Option 1 - Shared Parking - More Landscaping

## Option 2 - Onsite Parking - Less Landscaping

# MAC Site Plan - Option 1 - Shared Parking

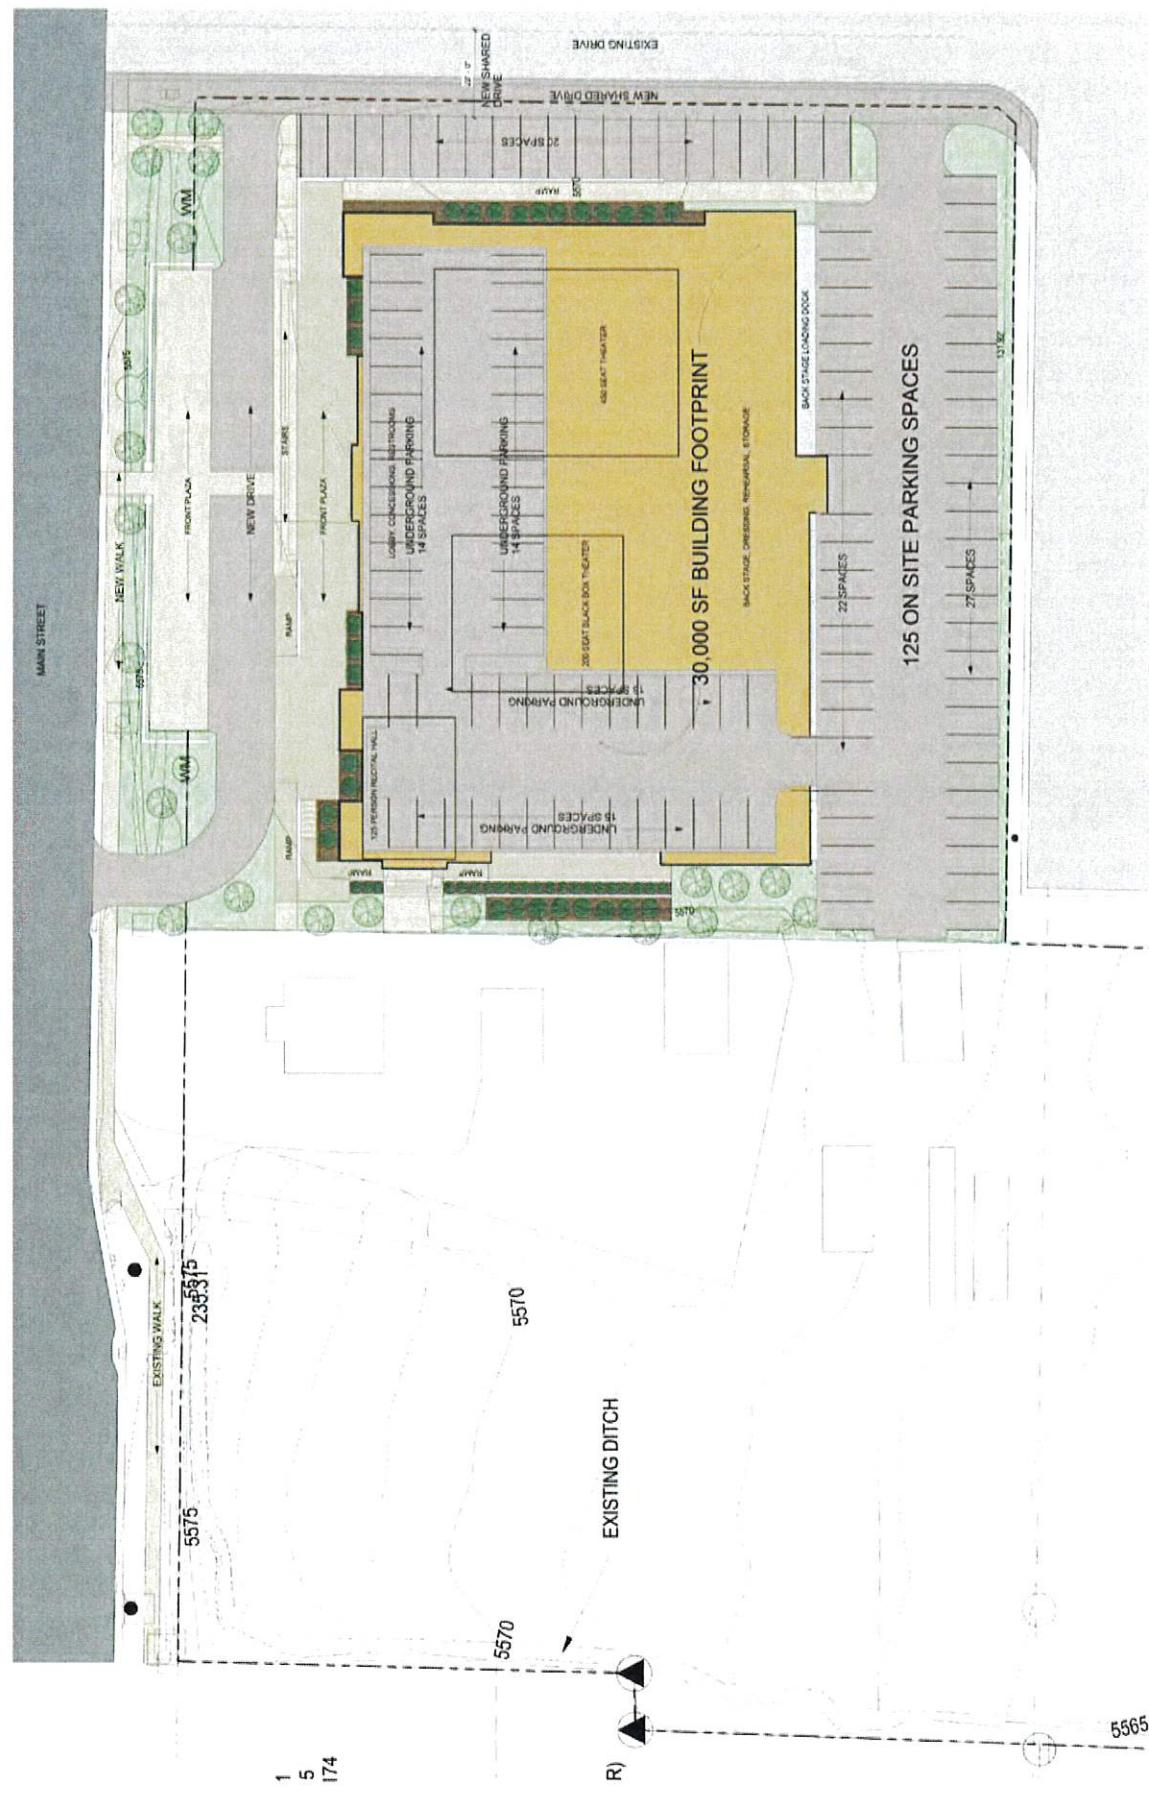

19

19

## MAC Site Plan - Option 2 - Onsite Parking

20

## OPTION 1 – SHARED PARKING – MORE LANDSCAPING

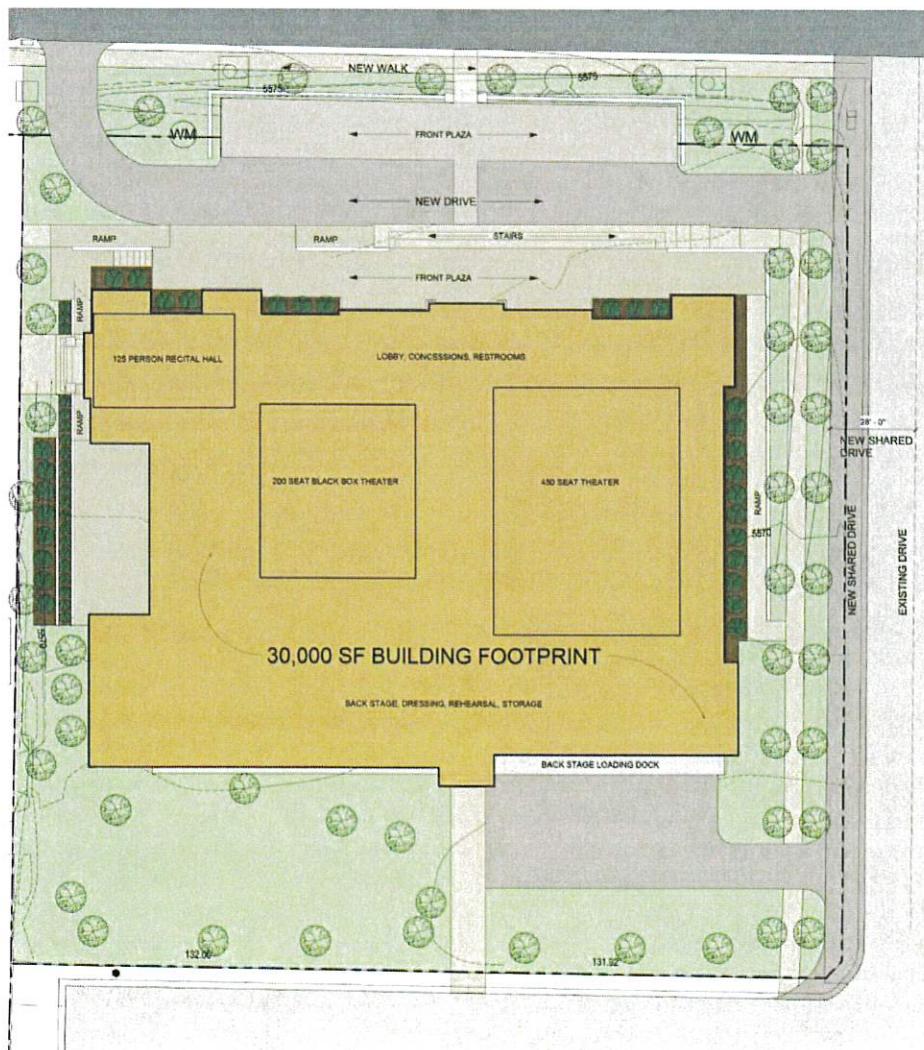

135 spaces are available on Millstream Properties land located near The MAC. Under City Code guidelines, 1 parking space is required for every 4 persons.

MAC maximum occupancy is 500 people – 450 in the Main Theater plus a maximum of 50 cast members and support persons. The MAC will require 125 parking spaces.

The MAC will not schedule any other events when a performance is ongoing in the Main Theater.

Combined audiences in the Black Box Theater (225 persons) and the Recital Hall (125 persons) will not exceed 500 people at any time.

Shared parking will allow beautiful landscaping to surround The MAC rather than asphalt.

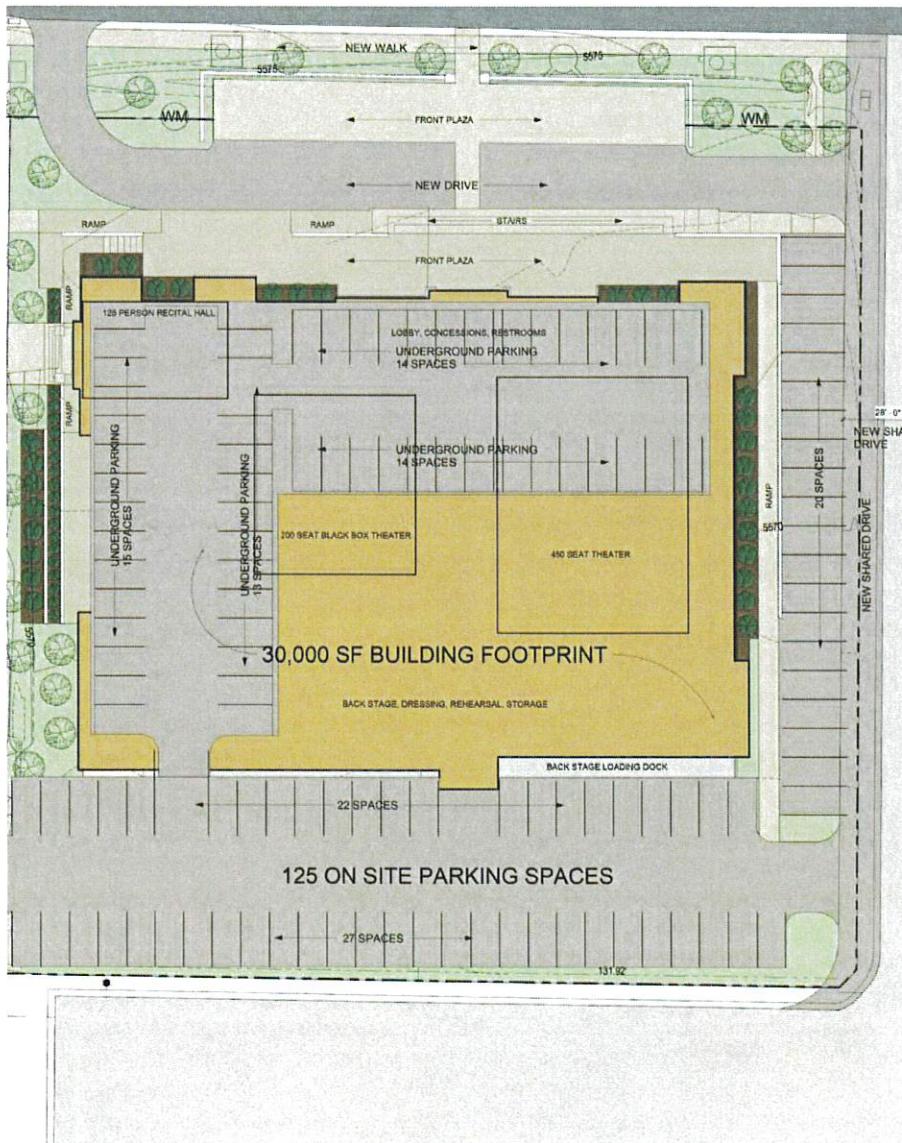

## OPTION 2 - ONSITE PARKING – LESS LANDSCAPING

The MAC site can accommodate up to 140 parking spaces, which will mean that some of the exterior landscaping will be eliminated.

The majority of the parking will surround The MAC, while some of it will be underground.

The MAC will require 125 parking places to accommodate the maximum 500 people which could occupy the building, including 450 patrons in the Main Theater and 50 actors and support personnel.

## Shared Parking Research

**QUESTION:** What is the likelihood MAC patrons would have parking places available in potential shared parking with Millstream Properties, located at 380 East Main, Midway?

**MAP OF SITE**

**RESEARCH METHOD:** Count cars parked in the parking areas noted above at about 7 p.m. nightly except Sundays. Parking spaces were not counted in front of Lupita's Restaurant (formerly Tarahumara Restaurant).

**POTENTIAL PARKING SPACES AVAILABLE:** 135 spaces.

**NEEDED for The MAC:** 125 spaces, including some onsite parking in front.

- FEBRUARY 9-March 21 – Average 13 cars, leaving 122 spaces available for MAC parking.
- PARKING RESEARCH WILL CONTINUE UNTIL APRIL 4, 2022

## FUNDING THE MAC

### The Fundraising Team:

**Matt Waldrip** - Managing partner of Dauntless Capital Partners. The group has raised over \$800m in equity and over \$1.5 billion in assets under management since March, 2021. Served as Chief of Staff to Senator Mitt Romney. Managed Romney's successful Utah campaign. Previously, head of network development for Solamere Capital. Executive Director of the E2 Summit, an exclusive annual gathering of world leaders in politics, industry, and media. Senior Finance Advisor to former Speaker of the House Paul D. Ryan and Deputy National Finance Director for Mitt Romney's 2012 campaign for president. BA from BYU. He will oversee fundraising for the MAC .

**Brent Lange** - Brent Lange, Manager, RaiseGood, LLC. Impact funding capital advisor and former V.P., Chief Administrative Officer, Treasurer and principal fundraiser for Hale Center Theater in Sandy. Brent first showcased his talents with the Utah Symphony, energizing the non-profit's fundraising programs with significant support from the community and private organizations. His passion for the arts continued in a lead role for Hale Centre Theatre. During his executive tenure, the theatre dramatically increased its facilities, budget, and number of patrons, becoming the sixth most-attended theatre in the world. Brent is currently serving as Chief Development Officer at Thanksgiving Point. Brent will assist as financial and organizational advisor.

**Jeff Strong** – Outstanding career history as a senior executive with such industry leaders as Procter & Gamble, Johnson & Johnson and Sun Products. Following his successful business experience, he has continued to provide leadership as a business consultant and private equity advisor. Most recently, he has helped educate a new generation of business entrepreneurs as the director of the marketing lab at the BYU Marriott School of Business. He is a key business and financial advisor to the Midway Arts Center Foundation. Jeff lives in Midway.

**Randon Wilson** - Successful career with prominent legal firms in Utah. In addition to his leadership in land use, agricultural, banking, business and corporate law, he has been a director of several prominent organizations in the legal and business world and a leader in his firms' organizations. Among his many community services, he has served as the chair of the This is the Place Foundation and the Midway Heritage Foundation. He has played a prominent role in the development of Midway and was recognized with his wife Gayle as Honored Citizens in 2014. He has been an important member of the Midway Arts Center Foundation since its inception.

**Local Fundraisers/Donors** – Twenty to twenty-five local, philanthropic supporters of the arts who will not only aid in procuring donations but will provide ongoing, local support for the continued operation of The MAC.

**Graystone Strategies** – Graystone Strategies is a comprehensive growth accelerator for businesses and non-profits. The company also provides donor research and communications, fundraising training, website development, assessment and growth strategies, digital fundraising, and provides donor presentations collateral.

**Stuart Waldrip** - Former business trial lawyer and Superior Court judge, currently specializing in mediation and arbitration. He has served as general counsel for several different companies in the hospitality, health care, entertainment and development industries, taught law at BYU and has presented at a number of continuing education courses in his field. He will manage financing and building the Arts Center. He has been with HVAF and the MAC since their inception.

## **THE PROJECT:**

Construction cost – 45,000 sf @ \$750/sf = ± \$33,750,000

Architectural/Engineering/Sound/Light Consultants = 10% or \$3,375,000

Land cost 1.6 acres = \$2.9 million

Endowment fund - \$4 million – to provide approximately \$200,000 each year for facility upkeep and to lower rental costs for local arts groups

**TOTAL: - \$44,025,000 or approximately e\$45,000,000**

## **THE PLAN:**

Foundations and Institutions - \$35,000,000

Individuals - \$10,000,000

## **WHEN WILL IT BEGIN?**

Immediately, once Midway City indicates general concept support for the project and general support for a C2 Zone text amendment to allow this project to proceed.

The sooner the better. The first of any given year is a very effective time to procure donations.

## TRAFFIC AND THE MAC

### 1. What will be the traffic impact of The MAC on Main Street?

- Traffic of attendees to HVAF events has been in Midway over the past 15 years and has gradually increased.
  - At its highest peak, carries no more patrons than can fit into the current MAC configuration.
  - **Main Theater – built for 450 patrons**
    - o “Seven Brides for Seven Brothers” (summer 2021), attracted 4,500 people over 11 days, with the final day attracting approximately 450 people.
  - **The MAC Black Box – built for 200-225 patrons**
    - o HVAF youth productions attract from 350 to 400 patrons per performance
    - o The Black Box will be sold out from the outset
    - o HVAF will run additional shows to allow everyone to see the show
2. A traffic study by Hales Engineering created in 2021 estimated 225 car trips per evening, with 218 trips occurring between 7 and 7:30 pm after peak traffic hours. This HVAF traffic is already on Midway streets.
3. MAC traffic will never be greater than it is now, but it will be more consistent
- a. Restaurants, resorts, and other businesses will receive increased, consistent revenues.

**Only ONE building does not obscure Mt. Timpanogos.**

# Answer

**EVERY building (except one)  
obscures the view of  
Mt. Timp, as do most trees.**

# Answer

Since buildings first appeared on Main Street, they have almost ALL blocked the view of Timp.

YET we STILL see Timp enough of the time to feel proud we live on the backside of Mt. Timpanogos!

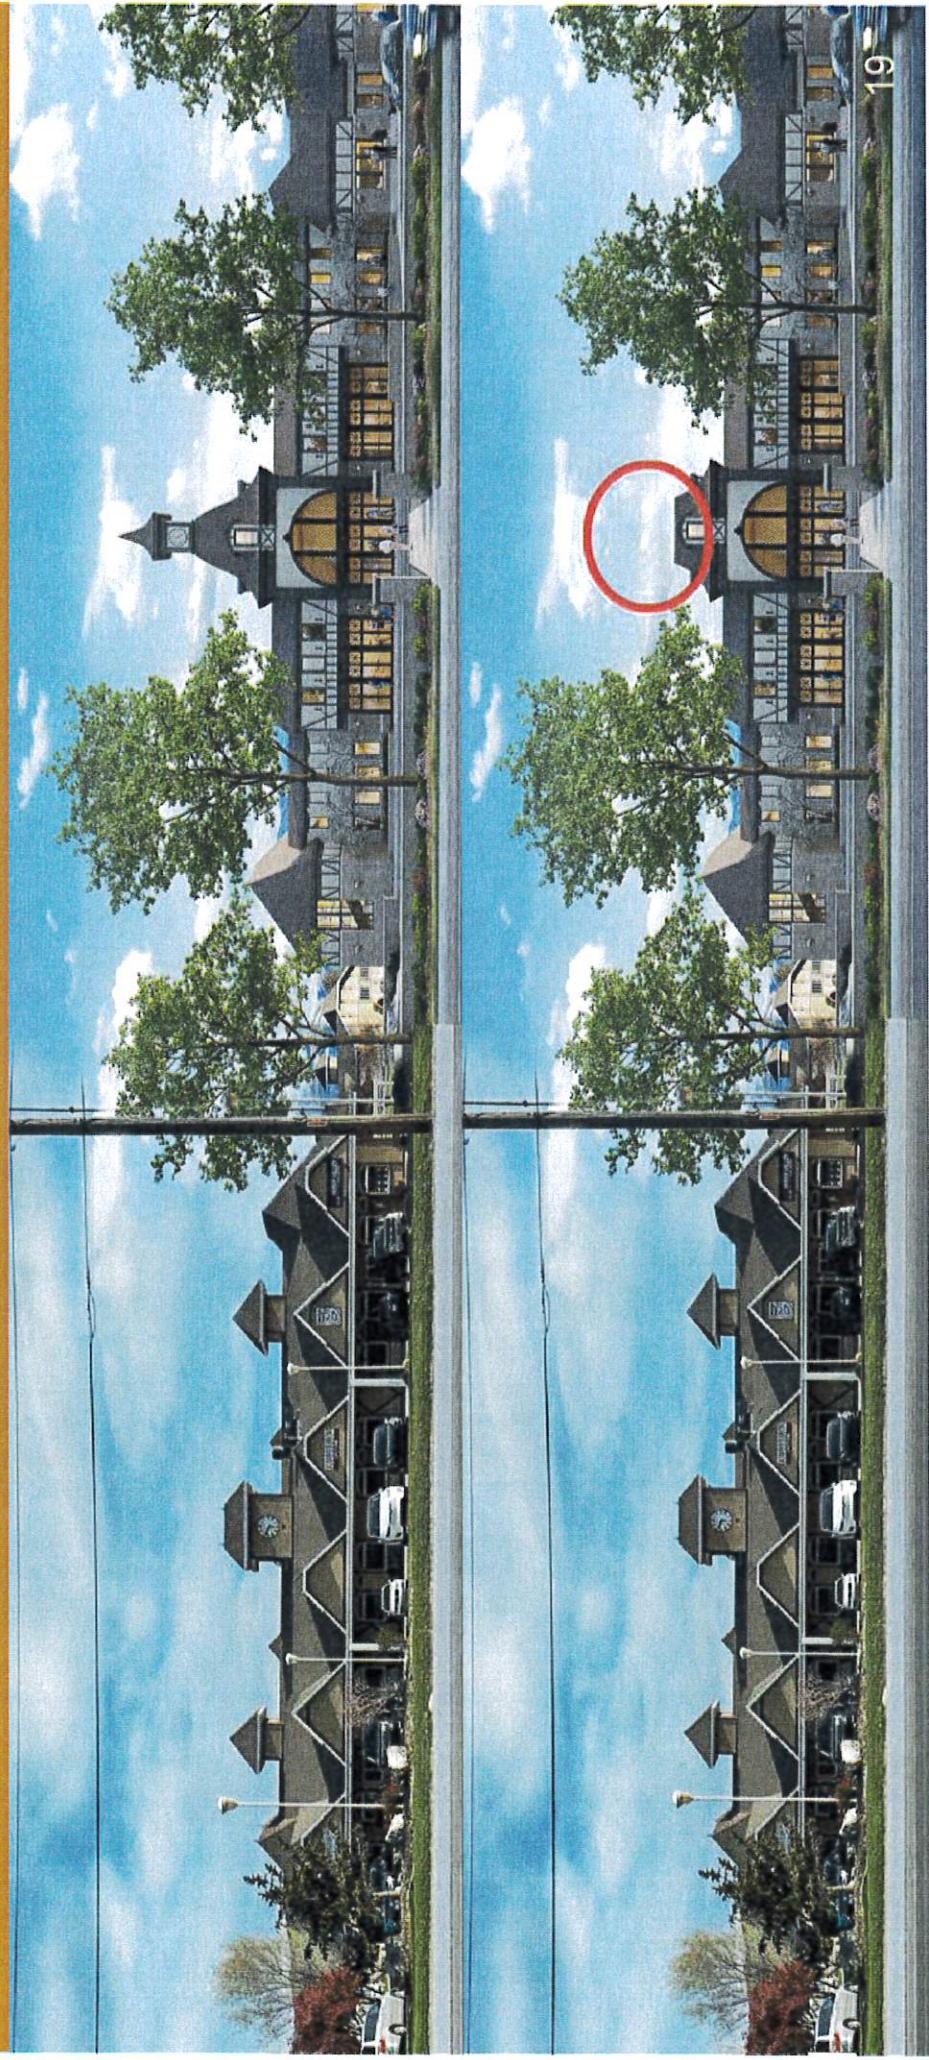

# Answer

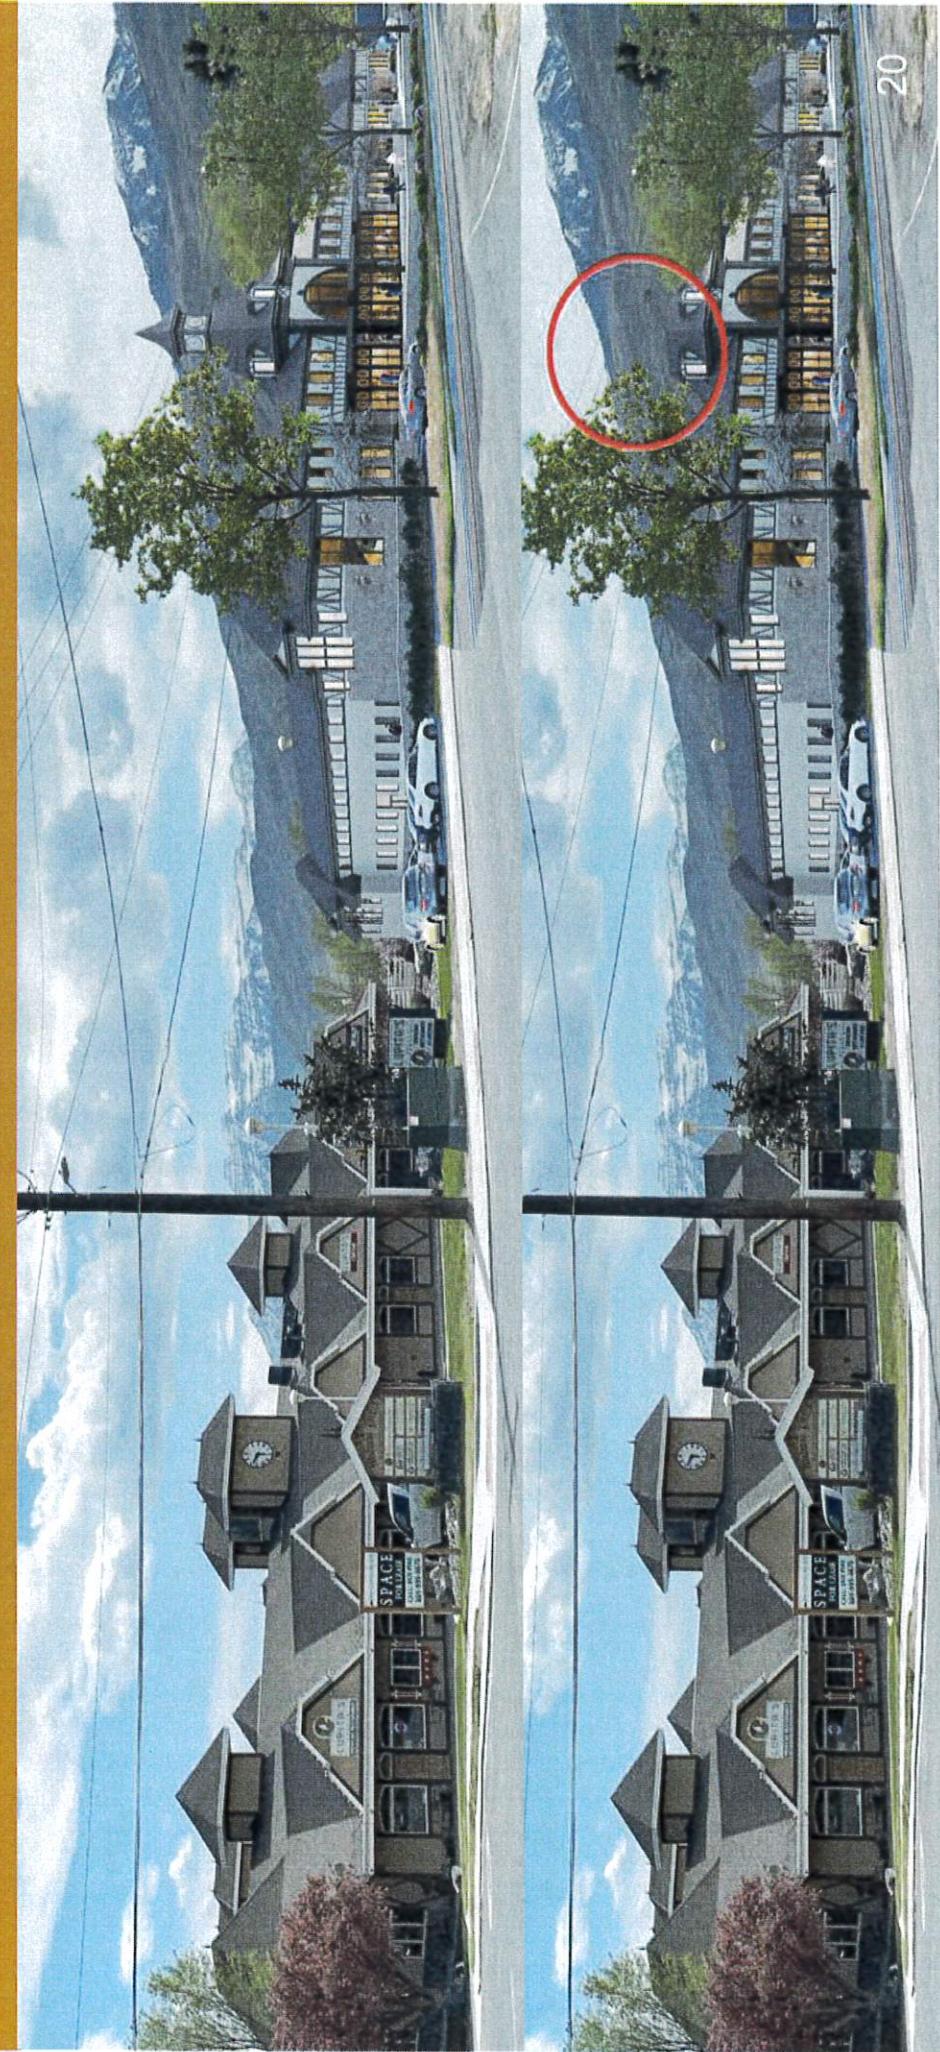

**Does the MAC clock tower block the view of Mt. Timp? No, but it WILL block a piece of the sky.**  
**The MAC itself will block the view of Mt. Timp exactly as every other building on the street (but one) does.**

  - **SUMMARY:** We've provided parking studies and 3 videos that show light traffic on Main Street and uncongested parking arrival during a 20-30 minute period in non-peak hours.
  - Traffic for the MAC will not differ from what Midway has experienced with HVAF shows for the past several years.

# *Planning Commission Request*

**Clarify parking for The MAC**

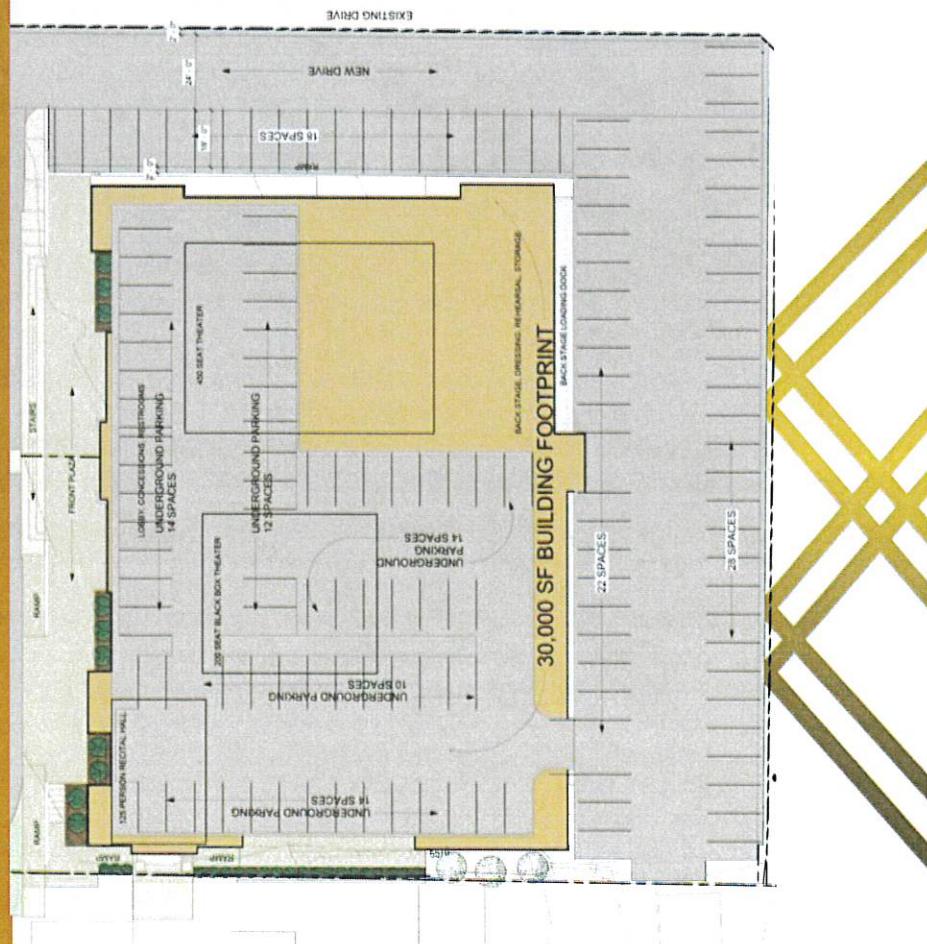

## Statewide Theater Parking Codes

- Cedar City – 1 parking space for 5 people
- Centerville - 1:6 auditoriums; 1:4 movie theaters
- Heber – 1:4
- Logan – 1:4
- Midway – 1:4
- Orem – 1:4
- Park City – 1:4
- Provo – 1:4
- Taylorsville - 1:4
- Salt Lake City – 1:4
- Sandy – 1:4

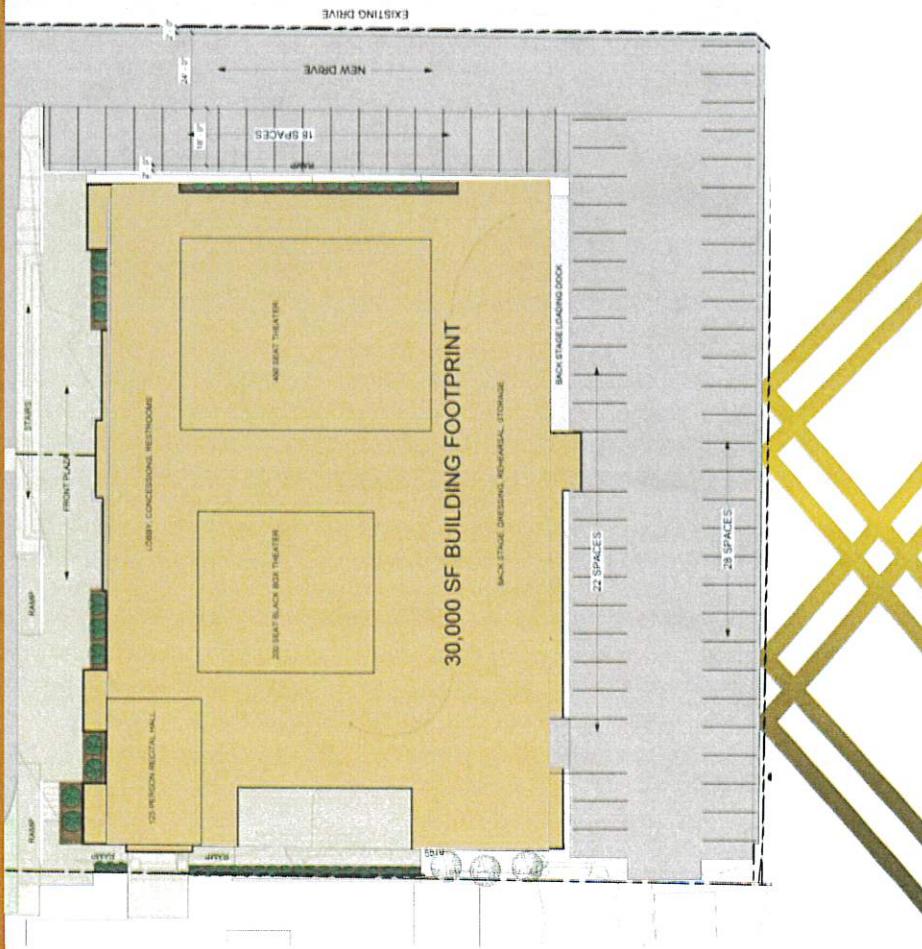

# MAC Parking – Completely Onsite

- MAC maximum occupancy is 500 people
- 1 parking space needed for every 4 people
- **MAC needs 125 spaces**
- Site can accommodate 68 spaces around the perimeter and 64 interior spaces
- **132 total parking spaces**

# MAC Parking – Onsite and 2 Minutes Away

- MAC needs 125 spaces
- Site can accommodate 68 spaces around the perimeter
- Olde Swiss Square has leased 60 spaces to The MAC in perpetuity
- Olde Swiss Square is 2 walking minutes away
- **Total of 128 total parking spaces**

14. Geotech report

## Bring The MAC to Midway!

- HVAF has a 15-year track record with NO RED YEARS, even through COVID and we have \$1M in gross receipts and a very healthy bank balance.
- 1,400 people saw “Shrek Jr” in April.
- “Sound of Music” in July is well on its way to being a sellout performance.
- 4,500 people enjoyed last year’s “Seven Brides” production, which sold out every night.

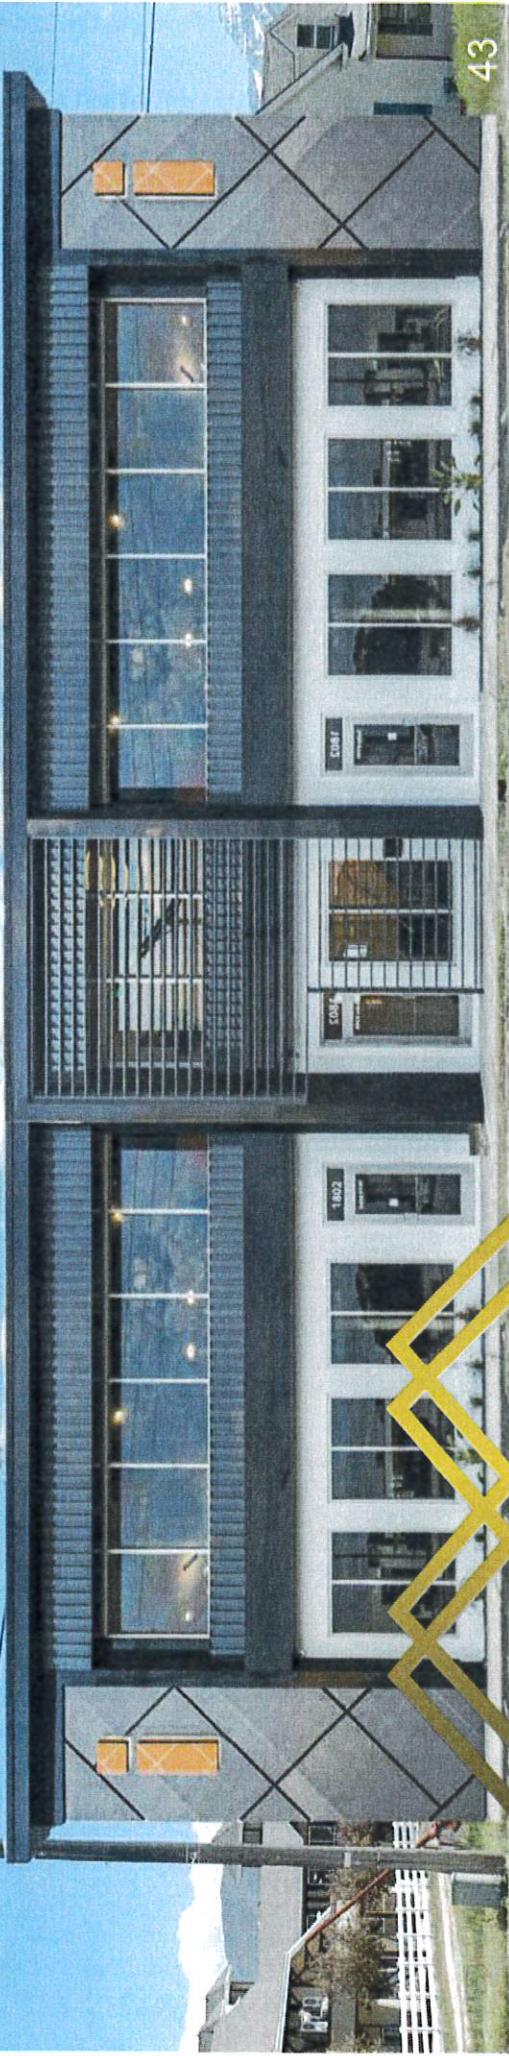

## Bring The MAC to Midway!

- 174 kids auditioned for 60 slots in “Lion King Jr”. 114 children did not get in the show.
- Once HVAF has a home, more than just two children’s productions per year will be presented.
- Over 200 parents are very aware that when The MAC is built, there will be increased opportunities for their children to participate in HVAF productions.

## Bring The MAC to Midway!

If The MAC is not allowed in Midway, a building such as this is permitted and could take its place.

## **Bring The MAC to Midway!**

A Code change amendment to allow the beautiful MAC building will meet Midway's Community Vision goals and will allow the arts to enrich lives long into the future.

Working Together, we can  
Bring The MAC to Midway!

Amendments**

## **PROPOSED CODE LANGUAGE AMENDMENTS**

### **Proposed changes in bold red text**

#### **1. USES IN THE C-2 AND C-3 ZONES**

To be Added to Section 16.5.2 - Permitted and Conditional Uses:

USES	C-2	C-3
<b>Indoor Performing Arts Centers (up to 50,000 sq. ft.) with largest audience venue up to 500 seats, primarily for live performances</b>	<b>C</b>	<b>N</b>

#### **2. SUPPLEMENTARY REQUIREMENTS IN ZONES**

##### **Section 16.13.10 Maximum Height Provisions for all Buildings**

The height of any building shall not exceed 35 feet. The total height shall be measured as the vertical distance from the natural grade, as defined in this Title, to the highest point of a roof. To allow for unusual conditions or appurtenances the following exceptions apply:

- A. Antennas, chimneys, flues, vents, or similar structures may extend up to 5 feet above the specified maximum height limit.
- B. Water towers and mechanical equipment may extend up to 5 feet above the specified maximum height limit.
- C. Church spires, bell towers, finials, and like architectural features as well as flag poles, may extend above the specified maximum height limit by up to 50 percent of the height limit (52 feet 6 inches for a 35-foot building), but shall not contain any habitable spaces above the maximum height.
- D. The height of buildings in Resort Zones may exceed 35 feet if all the requirements of the Recreational Resort Chapter of this Title are satisfied.
- E. Public buildings, **indoor performing arts centers (as to architectural features only)**, and churches may be erected to any height provided the building is set back from required building setback lines a distance of at least 1 foot for each additional foot of building height above the maximum height permitted.
- F. Special height requirements for some buildings on benches and slopes greater than 10 percent are imposed by the Sensitive Lands Chapter of this Title. These restrictions on building height shall be applied where applicable.

## Traffic Impact Study

**Midway, Utah**

December 20, 2021

UT21-1835

## EXECUTIVE SUMMARY

This study addresses the traffic impacts associated with the proposed The Village development located in Midway, Utah. The Village project is located on the north side of Main Street, east of River Road.

The purpose of this traffic impact study is to analyze traffic operations at key intersections for existing (2021) conditions with and without the proposed project and to recommend mitigation measures as needed. The evening peak hour level of service (LOS) results are shown in Table ES-1. Recommended storage lengths are shown in Table ES-2.

**Table ES-1: Evening Peak Hour Level of Service Results**

Intersection	Level of Service		
	Background	Mitigated Background	Plus Project
	Existing (2021)		
1 River Road / Main Street (S.R. 113)	e	A	A
2 Fox Den Road / Main Street (S.R. 113)	b	b	c
3 580 East / Main Street (S.R. 113)	b	b	c
4 670 East / Main Street (S.R. 113)	a	b	b
5 Access 1 / Main Street (S.R. 113)	-	-	c
6 Access 3 / River Road	-	-	a

1. Intersection LOS values represent the overall intersection average for roundabout, signalized, and all-way stop-controlled (AWSC) intersections (uppercase letter) and the worst movement for all other unsignalized intersections (lowercase letter)  
 2. BG = Background (without project traffic), PP = Plus Project (with project traffic)

Source: Hales Engineering, December 2021

**Table ES-2: Recommended Storage Lengths**

Intersection	Recommended Storage Lengths (feet)											
	Northbound			Southbound			Eastbound			Westbound		
	LT	RT	LT	RT	LT	RT	LT	RT	LT	RT	LT	RT
E	P	E	P	E	P	E	P	E	P	E	P	E
1 580 East / Main Street (S.R. 113)	-	-	-	-	-	-	-	-	-	-	-	50
5 Access 1 / Main Street (S.R. 113)	-	-	-	-	-	-	-	-	-	-	-	-

1. Storage lengths are based on 2021 95th percentile queue lengths and do not include required declearation taper distances  
 2. E = Existing storage length (approximate), if applicable; P = proposed storage length for new turn lanes or changes to existing turn lanes, if applicable

## I. INTRODUCTION

### A. Purpose

This study addresses the traffic impacts associated with the proposed The Village development located in Midway, Utah. The proposed project is located on the north side of Main Street, east of River Road. Figure 1 shows a vicinity map of the proposed development.

The purpose of this traffic impact study is to analyze traffic operations at key intersections for existing (2021) conditions with and without the proposed project and to recommend mitigation measures as needed.

Figure 1: Vicinity map showing the project location in Midway, Utah

## B. Scope

The study area was defined based on conversations with the development team. This study was scoped to evaluate the traffic operational performance impacts of the project on the following intersections:

- River Road / Main Street (S.R. 113)
- Fox Den Road / Main Street (S.R. 113)
- 580 East / Main Street (S.R. 113)
- 670 East / Main Street (S.R. 113)

## C. Analysis Methodology

Level of service (LOS) is a term that describes the operating performance of an intersection or roadway. LOS is measured quantitatively and reported on a scale from A to F, with A representing the best performance and F the worst. Table 1 provides a brief description of each LOS letter designation and an accompanying average delay per vehicle for both signalized and unsignalized intersections.

The *Highway Capacity Manual* (HCM), 6<sup>th</sup> Edition, 2016 methodology was used in this study to remain consistent with “state-of-the-practice” professional standards. This methodology has different quantitative evaluations for signalized and unsignalized intersections. For signalized, roundabout, and all-way stop-controlled (AWSC) intersections, the LOS is provided for the overall intersection (weighted average of all approach delays). For all other unsignalized intersections, LOS is reported based on the worst movement.

Using Synchro/SimTraffic software, which follow the HCM methodology, the peak hour LOS was computed for each study intersection. Multiple runs of SimTraffic were used to provide a statistical evaluation of the interaction between the intersections. The detailed LOS reports are provided in Appendix B. Hales Engineering also calculated the 95<sup>th</sup> percentile queue lengths for the study intersections using SimTraffic. The detailed queue length reports are provided in Appendix D.

## D. Level of Service Standards

For the purposes of this study, a minimum acceptable intersection performance for each of the study intersections was set at LOS D. If levels of service E or F conditions exist, an explanation and/or mitigation measures will be presented. A LOS D threshold is consistent with “state-of-the-practice” traffic engineering principles for urbanized areas.

Table 1: Level of Service Description

LOS	Description of Traffic Conditions	Average Delay (seconds/vehicle)	
		Signalized Intersections	Unsignalized Intersections
A		Free Flow / Insignificant Delay	$\leq 10$
B		Stable Operations / Minimum Delays	$> 10 \text{ to } 15$
C		Stable Operations / Acceptable Delays	$> 20 \text{ to } 35$
D		Approaching Unstable Flows / Tolerable Delays	$> 35 \text{ to } 55$
E		Unstable Operations / Significant Delays	$> 55 \text{ to } 80$
F		Forced Flows / Unpredictable Flows / Excessive Delays	$> 80$

Source: Hales Engineering Descriptions, based on the *Highway Capacity Manual (HCM)*, 6<sup>th</sup> Edition, 2016 Methodology (Transportation Research Board)

## II. EXISTING (2021) BACKGROUND CONDITIONS

### A. Purpose

The purpose of the background analysis is to study the intersections and roadways during the peak travel periods of the day with background traffic and geometric conditions. Through this analysis, background traffic operational deficiencies can be identified, and potential mitigation measures recommended. This analysis provides a baseline condition that may be compared to the build conditions to identify the impacts of the development.

### B. Roadway System

The primary roadways that will provide access to the project site are described below:

Main Street (S.R. 113) – is a state-maintained roadway (classified by UDOT access management standards as a "Community – Urban Importance" facility, or access category 8 roadway). Main Street (S.R. 113) has one travel lane in each direction. As identified and controlled by UDOT, a "Community – Urban Importance" access classification identifies minimum signalized intersection spacing of one-quarter mile (1,320 feet), minimum unsignalized street spacing of 300 feet, and minimum driveway spacing of 150 feet. The posted speed limit on Main Street (S.R. 113) is 35 mph.

River Road – is a city-maintained roadway. The roadway has one travel lane in each direction. The posted speed limit is 25 mph in the study area.

### C. Traffic Volumes

Weekday morning (7:00 to 9:00 a.m.) and evening (4:00 to 6:00 p.m.) peak period traffic counts were performed at the following intersections:

- River Road / Main Street (S.R. 113)
- Fox Den Road / Main Street (S.R. 113)
- 580 East / Main Street (S.R. 113)
- 670 East / Main Street (S.R. 113)

The counts were performed on Thursday, February 4, Tuesday, February 9, and Tuesday, May 25, 2021. The morning peak hour was determined to be between 7:30 and 8:30 a.m., and the evening peak hour was determined to be between 5:00 and 6:00 p.m. The evening peak hour volumes were approximately 22% higher than the morning peak hour volumes. Therefore, the evening peak hour volumes were used in the analysis to represent the worst-case conditions. Detailed count data are included in Appendix A.

*The traffic counts were collected during the COVID-19 pandemic when traffic volumes were slightly reduced due to social distancing measures. According to the UDOT Automatic Traffic*

Signal Performance Measures (ATSPM) website, the traffic volumes on February 6, 2020 (pre-social distancing) were approximately 17% higher than those on February 4, 2021. Therefore, the collected data were increased by 17% to represent normal conditions.

Traffic volumes were added from other incomplete or planned developments, including the following:

- Whitaker Farms
- Remund Farms
- Indian Summer
- Alder Meadows
- Midway Crest
- St Prex

These additional developments are estimated to generate approximately 188 trips during the evening peak hour, which were assigned to various routes.

Figure 2 shows the existing evening peak hour volumes as well as intersection geometry at the study intersections.

#### D. Level of Service Analysis

Hales Engineering determined that the River Road / Main Street (S.R. 113) intersection currently operates at a poor LOS during the evening peak hour, as shown in Table 2. These results serve as a baseline condition for the impact analysis of the proposed development during existing (2021) conditions.

#### E. Queuing Analysis

Hales Engineering calculated the 95<sup>th</sup> percentile queue lengths for each of the study intersections. No significant queuing was observed during the evening peak hour.

#### F. Mitigation Measures

According to UDOT guidelines, a traffic signal is warranted at the River Road / Main Street (S.R. 113) intersection. Because it performs at a poor LOS, it is recommended that one be installed. This may require some widening at the intersection to accommodate separate left-turn pockets on all approaches and right-turn pockets on the east- and westbound approaches.

With the proposed improvement, it is anticipated that all study intersections will perform at an acceptable LOS, as shown in Table 3.

### III. PROJECT CONDITIONS

#### A. Purpose

The project conditions discussion explains the type and intensity of development. This provides the basis for trip generation, distribution, and assignment of project trips to the surrounding study intersections defined in Chapter I.

#### B. Project Description

The proposed The Village development is located on the north side of Main Street, east of River Road. The development will consist of residential townhome and single-family units and some commercial, including retail, restaurant(s), office, and a clubhouse. A concept plan for the proposed development is provided in Appendix C. The commercial square footage used for this study is conservatively high to account for the possibility that additional space may be constructed. The proposed land use for the development has been identified in Table 4.

**Table 4: Project Land Uses**

Land Use	Intensity
Townhomes	143 Units
Retail	10,200 sq. ft.
Restaurant	23,900 sq. ft.
Office	11,100 sq. ft.
Health/Fitness Club	37,900 sq. ft.

#### C. Trip Generation

Trip generation for the development was calculated using trip generation rates published in the Institute of Transportation Engineers (ITE), *Trip Generation*, 10<sup>th</sup> Edition, 2017. Due to the mixed-use nature of the development, it is likely that several trips will be made via walking internally. Based on standard ITE methodology, mixed-use trip reductions of 8% and 38% were calculated for the morning and evening peak hour, respectively. These reductions were applied to all but the clubhouse land use as this type does not have its own field in the methodology. To be conservative, the evening peak hour reduction was lowered to 30%. For the clubhouse, because the HOA is anticipated to include memberships in its fees, it was assumed that approximately 12% of trips to and from it would be internal to keep the number of internal trips consistent with the prior square footage. Trip generation for the proposed project is included in Table 5.

The total new trip generation for the development is as follows:

- Daily Trips: 4,672
- Morning Peak Hour Trips: 300
- Evening Peak Hour Trips: 386

**Table 5: Trip Generation**

SOURCE: Hales Engineering, December 2021.

#### D. Trip Distribution and Assignment

Project traffic is assigned to the roadway network based on the type of trip and the proximity of project access points to major streets, high population densities, and regional trip attractions. Existing travel patterns observed during data collection also provide helpful guidance to establishing these distribution percentages, especially near the site. Based on existing vehicles entering and exiting River Road, 580 East, Fox Den Road, and 670 East from Main Street (S.R. 113), and the fact that Utah County and the center of Midway draw some traffic to and from the west, the east and west ends of Main Street (S.R. 113) were given equivalent distributions. The resulting distribution of project generated trips during the evening peak hour is shown in Table 6.

**Table 6: Trip Distribution**

Direction	% To/From Project
North	15%
South	5%
East	40%
West	40%

These trip distribution assumptions were used to assign the evening peak hour generated traffic at the study intersections to create trip assignment for the proposed development. Trip assignment for the development is shown in Figure 3.

## E. Access

The proposed access for the site will be gained at the following locations (see also concept plan in Appendix C):

### Main Street (S.R. 113):

- Access 1 will be located approximately 200 feet east of the Fox Den Road / Main Street (S.R. 113) intersection. It will access the project on the north side of Main Street (S.R. 113). It is anticipated that the access will be stop-controlled.
- Access 2 will be located directly across from the 580 East / Main Street (S.R. 113) intersection. It will access the project on the north side of Main Street (S.R. 113). It is anticipated that the access will be stop-controlled.

### River Road:

- Access 3 will be located approximately 880 feet north of the River Road / Main Street (S.R. 113) intersection. It will access the project on the east side of River Road. It is anticipated that the access will be stop-controlled.

## F. Auxiliary Lane Requirements

UDOT Administrative Rule R930-6 outlines minimum turn volumes (measured in vehicles per hour) to warrant auxiliary lanes. It is anticipated that auxiliary lanes are required for these accesses, as shown in Table 7 and Table 8.

**Table 7: Auxiliary Lane Summary – Access 1**

Auxiliary Lane Type	Minimum Requirement	Measure	Met?
Left turn	Deceleration (EB-to-NB)	25 vph	67 vph
Right turn	Deceleration (WB-to-NB)	50 vph	27 vph

**Table 8: Auxiliary Lane Summary – Access 2**

Auxiliary Lane Type	Minimum Requirement	Measure	Met?
Left turn	Deceleration (EB-to-NB)	25 vph	36 vph
Right turn	Deceleration (WB-to-NB)	50 vph	63 vph

## IV. EXISTING (2021) PLUS PROJECT CONDITIONS

### A. Purpose

The purpose of the existing (2021) plus project analysis is to study the intersections and roadways during the peak travel periods of the day for existing background traffic and geometric conditions plus the net trips generated by the proposed development. This scenario provides valuable insight into the potential impacts of the proposed project on background traffic conditions.

### B. Traffic Volumes

Hales Engineering added the project trips discussed in Chapter III to the existing (2021) background traffic volumes to predict turning movement volumes for existing (2021) plus project conditions. Existing (2021) plus project evening peak hour turning movement volumes are shown in Figure 4.

### C. Level of Service Analysis

Hales Engineering determined that all study intersections are anticipated to operate at acceptable levels of service during the evening peak hour with project traffic added, as shown in Table 9.

### D. Queuing Analysis

Hales Engineering calculated the 95<sup>th</sup> percentile queue lengths for each of the study intersections. No significant queuing is anticipated during the evening peak hour.

### E. Mitigation Measures

No additional mitigation measures are needed. It is estimated that the portion of project-related traffic traveling through the River Road / Main Street (S.R. 113) intersection will be approximately 11%.

While the Access 3 / River Road intersection works well operationally, a southbound left-turn lane could benefit River Road by separating the lefts from the thrus so that the thrus are not impeded.

### F. Recommended Storage Lengths

Hales Engineering determined recommended storage lengths based on the 95<sup>th</sup> percentile queue lengths given in the future (2021) plus project scenario. These storage lengths do not include the taper length. Recommended storage lengths for the study intersections are shown in Table 10. Intersections shown in Table 10 include new intersections and existing intersections that have recommended storage length changes.

**Table 9: Existing (2021) Plus Project Evening Peak Hour LOS**

Description	Intersection	Level of Service			
		Control	Movement <sup>1</sup>	Aver. Delay (Sec. / Veh.)	LOS <sup>2</sup>
River Road / Main Street (S.R. 113)	Signal	-	-	8.5	A
Fox Den Road / Main Street (S.R. 113)	NB Stop	NBL	-	18.5	c
580 East / Main Street (S.R. 113)	NB/SB Stop	SBL	-	18.2	c
670 East / Main Street (S.R. 113)	SB Stop	SBL	-	14.1	b
Access 1 / Main Street (S.R. 113)	SB Stop	SBL	-	19.5	c
Access 3 / River Road	WB Stop	WBL	-	8.0	a

1. Movement indicated for unsignalized intersections where delay and LOS represents worst movement. SBL = Southbound left movement.

2. Uppercase LOS used for signalized, roundabout, and AVSC intersections. Lowercase LOS used for all other unsignalized intersections.

Source: Hales Engineering, October 2021

**Table 10: Recommended Storage Lengths**

Intersection	Recommended Storage Lengths (feet)									
	Northbound		Southbound		Eastbound		Westbound			
	LT	RT	LT	RT	LT	RT	LT	RT	LT	RT
1 580 East / Main Street (S.R. 113)	E	P	E	P	E	P	E	P	E	P
5 Access 1 / Main Street (S.R. 113)	-	-	-	-	-	-	-	-	-	-

1. Storage lengths are based on 2021 95th percentile queue lengths and do not include required deceleration taper distances

2. E = Existing storage length (approximate), if applicable; P = proposed storage length for new turn lanes or changes to existing turn lanes, if applicable

**Olde Swiss Square Parking  
Lease**

## PARKING LEASE AGREEMENT

This Agreement is entered into by and between GREENFIELD INVESTMENT, LLC and/or OSSIBF,LLC ["Greenfield"], and MIDWAY ARTS CENTER FOUNDATION ["the MAC"], to be effective on the "Commencement Date," as set forth below, with regard to the following:

### PRELIMINARY FACTS

1. Greenfield owns and operates the building and its associated parking facilities located at 210 E. Main Street, Midway, Utah, commonly known as the Olde Swiss Square. The parking is virtually unused in the evening hours by other tenants of the Olde Swiss Square.
2. High Valley Arts Foundation is a sister organization to the MAC and will be the resident theater company in the new MAC facility at approximately 300 E. Main Street, about a half-block away from the Olde Swiss Square parking lot.
3. High Valley Arts Foundation is a tenant in the Olde Swiss Square, with its leasehold to begin when the tenant improvements have been completed by Greenfield. The basement leasehold will be used as a "studio" for rehearsals, auditions, classes, and the like for the indefinite future.
4. The MAC has a need for additional parking beyond that which is contemplated for the new facility and Greenfield is willing to provide parking for the evening performances of the events at the MAC between the hours of 7 PM and 12 AM, pursuant to the terms that follow.

In consideration of the above, the terms below and other good and valuable consideration, the receipt of all of which is acknowledged, the parties hereto hereby agree as follows:

### AGREEMENT

5. Commencement Date. The new MAC performing arts center is not yet constructed. The term of this agreement will commence upon the issuance of the occupancy permit for the MAC.
6. Term. The term of this agreement shall be for 10 years, with unlimited options of the MAC to renew the term for additional 10-year periods, in accordance with the provisions that follow.
7. Parking Allotment. The MAC shall be entitled to utilize 60 of the 74 parking spaces available from 7 PM to 12 AM nightly, whenever there is an event at the MAC, and for so long as the MAC is a functioning performing arts center.

SW

WNAK

8. **Rental Fees.** The basic rental fee is \$600 per month for year one with 3% annual increases, payable on the 1<sup>st</sup> of each month. For as long as High Valley Arts Foundation is a tenant of the Olde Swiss Square, The MAC will receive a discount on the rental fee based upon the percentage of the total parking to which High Valley Arts is entitled as a tenant of the building. The parties will cooperate in good faith to establish this discount in accordance with the principle just stated. In the event that High Valley Arts is no longer a tenant, the full rental fee will apply. Rent may be prepaid up to one year in advance.
  9. **Option to Renew.** No later than 90 days before the expiration of any 10-year term, the MAC shall give notice in writing of its intent to renew the agreement. The rental fee for the new term shall be based upon the difference in the Bureau of Labor Statistics published Consumer Price Index, Western Region, for all items, between the commencement date of the previous term and latest CPI prior to the commencement date of the new term, but will be no less than the last years rate. The new rate will continue to have 3% annual increases through the term of the lease.
  10. **Monitoring and Possible Annual Adjustment.** The parties will monitor the use of the parking and will cooperate in good faith to adjust the number of parking spaces covered by this agreement in accordance with usage requirements of the MAC and the Olde Swiss Square. However, the number of spaces shall never be less than required by the City of Midway for the operation of the MAC.
- GENERAL PROVISIONS**
11. **Integration.** This is the entire agreement between the parties and supersedes any prior or contemporaneous oral or written representations, agreements or promises with respect to the subject matter hereof. It may be modified only by a writing signed by the parties.
  12. **Inurement.** This agreement is binding upon and inures to the benefit of the heirs, personal representatives, principals, agents, officers, partners, affiliates, owners, subsidiaries, shareholders, directors, members, managers, successors and assigns of the parties.
  13. **Cooperation.** Each party agrees to sign such additional documents, provide such information, and cooperate as may be reasonably necessary to carry out the intent and purpose of this Agreement.
  14. **Counterparts and Delivery.** This Agreement may be executed in counterparts, in which case all counterparts taken together shall be one Agreement. It may be delivered by -pdf attachment to an email, by fax, by mail, by overnight delivery service or by personal delivery.

JMF 5/16

15. **Warranty of Authority.** Each person signing this Agreement on behalf of a party hereby warrants and affirms that he or she is fully authorized to do so by his or her principal.
16. **Delivery of Notices.** Notices required under this Agreement may be given in person, by text message, by email, or by next business day overnight mail service. Notices shall be effective as follows:
  - 15.1 if in person or by text message, on the day of delivery;
  - 15.2 if by email or overnight delivery, on the next business day following transmission or delivery to the overnight delivery service.

## **Fundraising Plan**

A team of successful experts is already in place, with Matt Waldrip leading

Preliminary presentations already made and well-received by a number of large donors, both institutional and local individuals, now waiting for City support.

Plan includes funding for building project and \$4 million endowment fund to assure ongoing maintenance and provide discounted rent for local arts groups.

## FUNDING THE MAC

### The Fundraising Team:

**Matt Waltrip** - Managing partner of Dauntless Capital Partners. The group has raised over \$800m in equity and over \$1.5 billion in assets under management since March, 2021. Served as Chief of Staff to Senator Mitt Romney. Managed Romney's successful Utah campaign. Previously, head of network development for Solamere Capital. Executive Director of the E2 Summit, an exclusive annual gathering of world leaders in politics, industry, and media. Senior Finance Advisor to former Speaker of the House Paul D. Ryan and Deputy National Finance Director for Mitt Romney's 2012 campaign for president. BA from BYU. He will oversee fundraising for the MAC.

**Brent Lange** - Brent Lange, Manager, RaiseGood, LLC. Impact funding capital advisor and former V.P., Chief Administrative Officer, Treasurer and principal fundraiser for Hale Center Theater in Sandy. Brent first showcased his talents with the Utah Symphony, energizing the non-profit's fundraising programs with significant support from the community and private organizations. His passion for the arts continued in a lead role for Hale Centre Theatre. During his executive tenure, the theatre dramatically increased its facilities, budget, and number of patrons, becoming the sixth most-attended theatre in the world. Brent is currently serving as Chief Development Officer at Thanksgiving Point. Brent will assist as financial and organizational advisor.

**Jeff Strong** – Outstanding career history as a senior executive with such industry leaders as Procter & Gamble, Johnson & Johnson and Sun Products. Following his successful business experience, he has continued to provide leadership as a business consultant and private equity advisor. Most recently, he has helped educate a new generation of business entrepreneurs as the director of the marketing lab at the BYU Marriott School of Business. He is a key business and financial advisor to the Midway Arts Center Foundation. Jeff lives in Midway.

**Randon Wilson** - Successful career with prominent legal firms in Utah. In addition to his leadership in land use, agricultural, banking, business and corporate law, he has been a director of several prominent organizations in the legal and business world and a leader in his firms' organizations. Among his many community services, he has served as the chair of the This is the Place Foundation and the Midway Heritage Foundation. He has played a prominent role in the development of Midway and was recognized with his wife Gayle as Honored Citizens in 2014. He has been an important member of the Midway Arts Center Foundation since its inception.

**Local Fundraisers/Donors** – Twenty to twenty-five local, philanthropic supporters of the arts who will not only aid in procuring donations but will provide ongoing, local support for the continued operation of The MAC.

**Graystone Strategies** – Graystone Strategies is a comprehensive growth accelerator for businesses and non-profits. The company also provides donor research and communications, fundraising training, website development, assessment and growth strategies, digital fundraising, and provides donor presentations collateral.

**Stuart Waldrip** - Former business trial lawyer and Superior Court judge, currently specializing in mediation and arbitration. He has served as general counsel for several different companies in the hospitality, health care, entertainment and development industries, taught law at BYU and has presented at a number of continuing education courses in his field. He will manage financing and building the Arts Center. He has been with HVAF and the MAC since their inception.

### **THE PROJECT:**

Construction cost – 45,000 sf @ \$750/sf = ± \$33,750,000

Architectural/Engineering/Sound/Light Consultants = 10% or \$3,375,000

Land cost 1.6 acres = \$2.9 million

Endowment fund - \$4 million – to provide approximately \$200,000 each year for facility upkeep and to lower rental costs for local arts groups

**TOTAL: - \$44,025,000 or approximately ±\$45,000,000**

### **THE PLAN:**

Foundations and Institutions - \$35,000,000  
Individuals - \$10,000,000

### **WHEN WILL IT BEGIN?**

Immediately, once Midway City indicates general concept support for the project and general support for a C2 Zone text amendment to allow this project to proceed.

The sooner the better. The first of any given year is a very effective time to procure donations.

Current letters of support  
from The Homestead and  
Zermatt Resorts

700 North Homestead Drive, Midway UT 84049  
435-657-3806

May 28, 2022

Dear Honorable Council and Commission Members,

The team here at Homestead resort is looking forward to the possibility of the Midway Arts Center and is in full support. Midway is full of unique opportunities for local and traveling guests and the MAC will be another great asset to add to the community.

As a resort, we are always looking for places to recommend nearby. The community should seek to continue to bring more venues like the MAC to the city as it will bring revenue to our community and have a great impact.

Sincerely,

Andrew Carey  
Director of Hotel Operations

Midway City Council

Midway Planning Commission

75 N. 100 W.

Midway, Utah 84049

Dear Honorable Council and Commission Members

18 May 2022

My name is Richard Saltzman and I am the Manager of Legacy Resorts, LLC. Legacy Resorts is the owner of the Zermatt Resort and has been for many years.

I am writing in support of the Midway Art Center Foundation plan to provide a state-of-the-art performing arts center in Midway.

I am familiar with the leadership of the MAC and of High Valley Arts and their 15-year history of outstanding events in Midway. I have confidence in the plan for the MAC and firmly believe it would be a wonderful gift to the community for many years to come.

Not only would the MAC benefit the youth and adults who participate in performances, but it would continue to draw significant 'arts tourists' to Midway, as the High Valley Arts performances have consistently done in the past.

The audiences coming to the arts center would naturally benefit the businesses in Midway – from restaurants to the resorts – and everything in between. At Zermatt, we have always been looking for activities for our guests that would enhance their stay. The arts center is a perfect example of what we need to help the resort grow and stay healthy.

In short, the Zermatt is in favor of the plan to 'Bring the MAC to Midway.'

Sincerely,

Richard Saltzman, Manager  
Legacy Resorts, LLC

ZERMATT UTAH

May 23, 2022

Dear Midway City Council:

The Zermatt Resort and Spa appreciates the opportunity to share its support for the proposed performing arts center in Midway, Utah. For several years, owners and guests at the resort have enjoyed the programming provided by the arts community throughout Heber Valley, including presentations of *The Christmas Carol*, *Annie*, *The Sound of Music*, *Oliver*, *The Music Man*, and many others — all performed in Midway and providing not only high quality entertainment but an opportunity for members of the community to share their gifts, individually and collectively.

A little over a year ago (May 12, 2021) Peter Rancie, then a director at the Zermatt Resort and Spa, sent a letter of support that outlined a persuasive rationale for the new venue. Among the reasons, Peter cited the need for destination amenities in Midway and the business opportunities that would benefit the city, its stores, hotels, restaurants, recreational destinations, and service outlets. All of this will result in an improved tax base for Midway City and contribute to the wonderful brand Midway already enjoys throughout Utah and the larger United States.

With this letter, I reaffirm the support articulated by Peter and offer to provide any additional information or assistance that may be necessary in this important endeavor.

All my best,

William Nixon  
202.641.2882  
Zermatt Resort & Spa

537 petitions from Midway voters

204 petitions from others

## **Notable Petition Comments**

Mark Dennis, Midway resident - if we fail to plan, we plan to fail.

Cary Hobbs, Midway resident - The Arts Center would make Midway unique...would contribute to our reputation as being a beautiful place to live instead of just another strip mall, California look-alike. Please do this for the generations to come!!!

Jenn Iverson, Midway resident - Theater is such an important part of our community! In order for our kids, teens, and adults to be able to develop in theater, we really need a better venue for performing. The MAC is a great plan to allow this growth in a way that preserves the beauty of our town.

Melanie Berrett, Midway resident - I know that the MAC will stay true to the values of Midway residents while providing an opportunity for the growth and development of our community at large. We cannot afford NOT to build this art center.

Pierette Tierney, Midway resident - We love the theater and feel like the MAC will set Midway apart.

Russ Watts, Midway resident - We support the theater in Midway.

Karl Snow, Midway resident - I urge you to vote yes to a Midway Arts Center in our community.

Susan Peay, Midway resident - Please let us have the Arts Center.

Marilyn Clark, Midway resident - It's so important to keep Midway a charming, quaint place...Please keep Midway close to its European roots!

111						An Arts center will be Benefit our local residents and businesses as well as attracting visitors. More successful businesses will keep our property taxes down, especially beneficial for our long-term residents. And everybody can agree on the need for more dedicated green space. Please consider the positive impacts this project will have on our growing community.
112						Keep us rural

117	3/30/2021 16:45:44	Jamie Giordano	atherenabiaz@gmail.com	52 W Farm Springs Lane	Yes	If I had to choose between this and the arts center being promoted by the Heber City group, I would pick this without a doubt. And, it appears that one or both will happen. In the near term, I do not expect this to bring in visitors from outside the community other than friends and relatives of the performers. The main reasons I support this is that this group is not seeking taxpayer support to maintain their program. The Heber City group is looking for initial funding plus ongoing taxpayer assistance through taxes such as a property tax levy or a sales tax or both. Thank you (Mayor and City Council) for the hard work that you do. Regards, Brent Crittenden

						I strongly support MCA being in Midway and I think this is a great site.
						All parties might consider another site plan that may have a greater benefit for the community and for the Arts Center. I encourage the City and MCA to consider an option C site plan. Option C should have the MCA at front of property along Main street with parking and residential development between MCA and Memorial Hill. The MCA next to Main Street would contribute to the character, vitality and continuity of Main Street. I realize that Memorial Hill can be a good backdrop for outdoor performances, but I assume this will be a facility in use year round. Don't underestimate the value of street presence of the MCA building being front and center in the Midway community fabric.
						Again I voice my support of the MCA being in Midway and this is an excellent location for the performance arts center whatever the site plan.

						Midway should celebrate its origins as a quaint town with a plan, instead of doing what every other little town does and let commercial building rule Main Street. An arts center would improve nightly entertainment for local hotels and provide great activities for the community, and a dedicated place for performers. Town Hall is no longer adequate for what Midway wants to do with its art scene. I applaud this petition.

349	5/25/21 6:44	Frank Platt		1123 Dutch Fields Pkwy	Yes	We need to re-think development of Midway, both in commercial and residential enterprises. Memorial Hill is unique to Midway. It is our Eiffel Tower and, like the Eiffel Tower, its base should be open space so residents may gather and enjoy its simple beauty. The MAC design allows this to happen.
350	5/25/21 8:27	Erin Seamons		90 N 400 W, Midway, UT 84049	Yes

370	5/27/21 8:08	Michelle Greene		340 E. 1690 N	Yes	
				I still like the whole OPEN view of the land in front of Memorial Hill we don't need anymore buildings put up in this town it attracts way too much attention and traffic becomes too much on Main look at the customers dodging traffic or running across just to get to Lola's they don't use the crosswalk at the lights. Let's just have a wide open space I would rather see the cows there only.		
371	5/27/21 8:50	E. Henderson		Maybe	Yes	Pleas don't allow ugly commercial buildings on Main Street- we need to keep the charm of Midway- less density please.
372	5/27/21 10:34			333 East 180 North Midway UT 84049	Yes	
373	5/27/21 18:53	Marilyn Clark	lwwarencarlark@gmail.com	1070 Clearwater Way	Yes	It is so important to keep Midway a charming, quaint place. It can grow ugly or it can grow charming. Commercial buildings proliferate and become visual clutter. Once it's gone, you'll never get it back again! Please, keep Midway close to its European roots!

382	5/29/21 11:29	Linda Stice		Po 1018	Yes	
						Even if the art center canon become a reality, please leverage the design of the facility to develop the space with Memorial Hill as a backdrop and small shops surrounding a common green area.
						Look at some of the mixed use developments happening in Farmington Station, 9th & 9th in Sugarhouse, and Desert Color in St. George to leverage the beauty of our surroundings to make a good decision for the future.
						Please consider alternatives to the age old main street look. We can do better.

	7/12/21 21:17	Kimberley Rancie	kimberleyrancie@gmail.com	784 Resort Drive Midway	Yes	A dedicated space for the performing arts, including live music performances, would be a wonderful addition to the community. I have performed at Swiss Days, performed with the HVO and smaller ensembles at the Midway town hall (and TVT) and have children who perform with HVA. I know well the constraints, challenges and extraordinary volunteer hours required to put in all such shows. My regular patronage of town hall events also has also exposed me to the need for larger, more suitable performing space. Midway is growing and we need well rounded facilities to grow along with it. Even if I were not a supporter of the arts I would support the intended location of the MAC. The new "Graintary" is an eye sore and blocks the view of Memorial Hill - an iconic and treasured landmark. Too many houses and commercial buildings are being permitted to build up high, right by the roadside, blocking out the view of all the beauty that people move here for in the first place. Please keep Midway beautiful. Another point: decades of studies have shown that children who grow up having regular involvement in or exposure to fine arts are more literate, more emotionally stable and better contributors to society than their counterparts. Let's make Midway great for the rising generation as well as those here now. Thank you for listening to the community.

482	7/26/21 12:46	Amber Barnes	inhispeace@gmail.com	369 Cottage Creek Ct	Yes	I would love to see this land being used for an arts center and open space, which will beautiful and enhance the overall community by bringing in wonderful productions, and a place to walk around and relax—and maintain the charm of this quaint town! I'd much rather have this go in than a crammed apartment/condo development! Thanks!
483	7/26/21 13:51	JANET L MORTENSEN	Randy.mortensen@gmail.com	1125 Swiss Alpine Road, Midway, UT 84048	Yes

488	7/27/21 15:16	Deborah Stimson Snow	snowbzness@hotmail.com	P.O. box 997 Midway UT	Yes	I founded a Performing Arts Center in PA in 2007 which is still going strong. It became a magnet for businesses, culture and community unlike anything that the town had ever seen. It also provided a safe and healthy atmosphere for kids education in the arts. There are not down sides to this addition to our neighborhood.
489	7/27/21 16:57	Nan Hutchins	Nanhuichins@mshs.com	91 W Village Ct	Yes	Very best thing for Midway!!!
490	7/27/21 18:13	Robert B Hutchins	brucehutchins@msn.com	91 w Village Court	Yes	The MAC is absolutely necessary to maintain the uniqueness of Midway that we all love.

66	4/2/2021 8:21:22	David B Rimington	Rimedb7@gmail.com	1085 Cobblestone Drive, Heber City	No	Among all your other considerations, remember the value the arts are to developing well rounded communities. In our present splintered and hurting nation and cities, we need to balance our lives.
67	4/2/2021 8:30:34	Kay Rust	Kedust@msn.com	1008 Cobblestone Heber Utah	No	We have been active in High Valley Arts since its beginning. I have seen the wonderful experiences that the Midway children and adults have had who participated and the long and arduous hours of those who set up and tear down sets and staging. It's time that they have a theater so that the program can grow.
68	4/2/2021 8:33:26	Dennis Brune	denmarb@aol.com	1152N Village Circle Midway, UT 84049	No	
69	4/2/2021 8:39:03	Harold L. Rust	hlrus18@gmail.com	18280 Delenka Lane, Lake Oswego, OR 97034	No	I have seen several of your performances while visiting in Heber. It is very possible we may move to Heber in a short time and the prospects of having this fine performance center close by is something I strongly support. Such an event center enhances the quality of life and makes everyone's experience in the Heber Valley--whether a resident or a visitor--much more gratifying and meaningful.

						Even though I do not live in Midway city limits (I live in Heber City), this Midway Art Center will bless many in the surrounding community and beyond. This growing community needs a venue to house the many performances and events in their art community. Fine arts are a vital part of education, and the MAC will help to ensure adequate facilities to continue expanding this field in our community.
87	4/2/2021 10:42:25	Allison Buhman	allispiano@Hotmail.com	2044 S 400 E Heber City, UT 84032	No	I think an Arts Center in Midway would benefit Midway and the Heber area in so many great ways. Not only could the performing arts flourish, but there would also be a positive economic benefit to the local economy. It looks like there is already a hub of enthusiastic and experienced actors, directors and producers in Midway who would certainly help make this project successful.
88	4/2/2021 10:50:09	Roger Thompson	roger@tmequities.com	4228 E. Winchester #100, Salt Lake City, UT 84107	No	Yes, I support the building of the Midway Arts Center theater. The MAC will preserve Memorial Hill and green space in downtown Midway and should be approved by the City Council as soon as possible.
89	4/2/2021 10:51:24	Elizabeth Callagher	elliecat1@msn.com	128 Timbertakes Heber City, UT 84032	No	This would be a great addition to the area. Even though I don't live here, I have had the privilege of performing for two shows and I love the arts, so I am very much in favor of this.
90	4/2/2021 11:00:56	Janet Greenhalgh	igreenoukh@msn.com	1652 N 270 W Pleasant Grove Ut 84062	No	We need a better performing and recital venue in Heber Valley.

Mayor Celeste Johnson and City Council (Lisa Orme, Steve Dougherty,  
Jeff Drury, Kevin Payne and JC Simonsen)  
75 N 100 W  
Midway, City 84049

Re: High Valley Arts Center

Dear Mayor Johnson and City Council Members,

Thank you for your devoted service to our community. You are each individually and collectively an inspiration of civic service preserving our community as a choice place to live.

This is to express my support for consideration and approval of a performing arts center in Midway. I understand the current proposal is for a location at the base of Memorial Hill.

I am grateful for your care and concern to control the growth of our community. In general, I favor controlled growth. As we all know, part of the magic of our community is its small-town charm and rural character. We hope that won't be lost in the coming years.

My wife was raised in Boulder City, Nevada which years ago passed a growth ordinance limiting growth to less than 3% per year. As a result, the community of her childhood is much the same today as when she was a young girl. It retains its "small town feel" unlike its sprawling neighboring communities of Henderson and Las Vegas. Driving into Boulder City from Las Vegas/Henderson is a breath of fresh air. We all experience that same dynamic even more accentuated driving into this valley from any direction.

As for the property in question, already under development, a community arts center is far more appealing and would make a far more valuable and unique contribution to the character of Midway than additional housing, offices or commercial buildings in the same development.

We also have the advantage of knowing that such a proposal is not "pie in the sky" because High Valley Arts has demonstrated an unusual investment and devotion to the community of Midway over the years. One may question whether Midway has the population base to support such a center, but the history of High Valley Arts seems to demonstrate that it does. It is particularly timely to consider the proposal now, as we continue to be the beneficiaries of High Valley Arts dedication and devotion to our community.

Thank you for your valiant service to our community and favorable consideration of the proposal for a performing arts center in Midway.

Respectfully and gratefully,   
Lawrence E. Corbridge

June 17, 2021

Dear Mayor and City Council Members,

I am writing in support of the Midway Arts Center. There are several reasons that I see as a benefit to our community.

First and foremost is that art is an important aspect of all of our lives. All people benefit by art and the ability to see things from a different perspective. The performing theatrical arts are a unique form of entertainment that allows actresses and actors to interact with the audience which is something Hollywood cannot replicate.

Second, as far as I am aware this arts center is not asking for public funds to support the land purchase, building construction or ongoing expenses. Where we already have plenty of demand for our tax dollars, it is refreshing to see someone trying to do something of this nature that does not expect or demand funding.

Third, I have been to several of HVA performances and I will say that they desperately need a permanent location for rehearsals and set builds. I'm not quite sure how successful any operation of this nature can be when they have to contend with inclement weather or shared space. A dedicated facility will definitely enhance their ability to produce high quality entertainment.

Fourth, I've heard and must agree that Wasatch County needs more things to attract visitors. As I have talked to venue operators, the common message is that the more Wasatch County has to offer the more visitors it will attract. Since Midway in particular is interested maintaining the resort tax benefits, you should be looking at whatever means possible to attract more visitors and potentially more overnight lodging. Helping Zermatt and Homestead to be successful will definitely benefit Midway.

Fifth, the developer of this parcel of land will build something in this location regardless of what you decide. I think it is in the community's best interest to allow this development as opposed to additional housing.

Sincerely,  
Marilyn Crittenden

June 23, 2021

My name is Ali Dabier, current president of the Midway Boosters and a longtime member of the Booster's Board. The Midway Boosters as a body of community volunteers dedicate much time for the betterment of our community not only for its citizens and inhabitants, but also for those that come to visit during all seasons and enjoy our beautiful mountains, lakes and trails, not to mention the Swiss day tradition that has lasted 73 years so far. We also generate significant funds that goes toward national and international humanitarian services, various youth and adult art and music programs and education scholarships. We are proud of our community and the hundreds of volunteers that share the same vision. Having a performing art center will further enhance the reputation and desirability of this community. For years my wife and I have been the beneficiaries of the performances that were offered by the High Valley Arts organization. It, not only has produced high quality performances but also has engaged many of our talented community members. We have enjoyed sitting on the grass during the outdoor performances, but welcome a permanent venue and all that it can offer throughout the year to our wonderful community and its visitors. I fully support the building of the Performing art center at the base of the ever so prominent Memorial Hill.

Sincerely

Ali Dabier

Sue,

You, Stu and the High Valley Arts Foundation family can count on those of us who have watched, observed and participated with you, in some way, with the ongoing development of quality theater in Wasatch County.

During the past several years my position as managing member of the Zermatt Resort and Spa and The Homestead Resort has enabled our resorts, city and county to realize the economic value of High Valley Arts especially during your professional productions.

The thought of a quality theater in the Midway area that is open during every season multiplies the value of our resorts and surrounding area exponentially.

Thank you for your theater center vision and action that will help change the value for all of us who live in the area and who have personal and professional area interests.

Best Regards,

Steve Eddington  
(Former Managing Partner for Zermatt and The Homestead Resorts 2010-2020)

Sent from my iPhone

As a Vietnam Veteran, I'm honored and proud to have my name with so many others on one of the plaques at the top of Memorial Hill. We must never forget those who made the sacrifice to defend freedom and the liberties we so freely enjoy in this country, state and valley. We need to keep those remembrances in our hearts and minds.

The proposed Midway Arts Center will help us do just that as they present "Let Freedom Ring" programs and events that will engage youth and adults alike with enjoyable and teaching productions that will reinvigorate our feelings towards our freedoms and rights and propel the next generation toward preserving the same.

Not only will the Midway Arts Center help us preserve freedom ["Let Freedom Ring"], but the placement of the Center will help preserve the view of Memorial Hill so that it will remain a beacon and a reminder to all of us of those few who have sacrificed so much for so many.

Signed, *Blaine J. Epperson*

Midway City Council

To whom it may concern,

We moved to this beautiful valley and city about 9 years ago. Shortly thereafter, we became introduced to the summer and winter plays put on by the Midway Arts Center. We started inviting our friends and relatives from Salt Lake up to visit and see the plays with us. The talent is amazing we have in this valley and everyone recognizes this as a huge asset.

We believe the Performing Arts Center needs to be built in Midway and would be a huge asset in attracting more people to visit and spend money here in Midway.

We hope the City Council can have the vision as well to help the PAC be built on the Main Street side of Memorial Hill.

Thank you for your help in advancing this wonder cause in our city.

Sincerely,

Nathan Hanks

Cary Hobbs:

I like the idea of having an outlet for art and entertainment in Midway to augment the already well-known tourist and community activities in our city. We need as much of that as we can get! This will be an opportunity to attract people from all over the world to our unique community and to give residents a chance to participate in and enjoy dramatic productions. It would be another reason for us to brag that there's no better place to live than in Midway, Utah!

**BARRY L KENT**  
1420 S 200 W, Midway, UT

Midway City Council,

May 17, 2021

I would like to provide my strong support for a Performing Arts Center in Midway along with  
the proposed location South of Memorial Hill as part of the European Village concept.

Having a Performing Arts Center in Midway on Mainstreet is a once in a lifetime opportunity. It is a legacy opportunity to show others in the future what we value most. No other group over the past several years has proposed anything even close to the vision of the Midway Arts Center along with the millions of dollars of funding they will bring to our community along with the positive tax and destination revenue impact. Midway is unique amongst all Utah small towns. A Performing Arts Center will add to everything Midway and be additive to what visitors are hoping to find when they visit.

We are all witnessing the powerful market forces that are in play that every available piece of property in Midway will be developed. Taking no action on the MAC is a vote for more housing development.

I would like to respectfully ask for each of the city council members support for a Performing Arts Center in Midway.

Sincerely,

Barry Kent

June 22, 2021

Re: Midway Performing Arts Center

I am in support of a performing arts center in Midway. Our charming mountain village is growing rapidly and an obvious destination. I believe we would benefit from a modest arts center. The proposal, which has been developing in recent years seems to have many advantages – if it can be fit into our wonderful community. While there are many challenges to a project like this, I am in favor of our trying to make it happen!

Thanks,

*Mark*

Mark Nelson

Midway resident and member of the Wasatch County Council

Dear Mayor and City Council Members,

This letter is written in support of the proposed Midway Arts Center.

For years I have watched as the founders of High Valley Arts and many other dedicated individuals have worked tirelessly to provide high quality and wholesome theatrical productions for the enjoyment of Wasatch County residents and visitors. This has been done cooperatively with other production companies, sponsors, and neighbors. The large number of committed people are a clear indication of continued interest and the ability to marshal required resources to make the MAC a reality. This is a concept that has a sound foundation of experience and professional expertise.

These individuals have overcome challenges; uncertain weather, parking, venue construction and maintenance, and other obstacles with determination and diplomacy. Midway City leaders have the past fourteen years of history showing that the production companies will be consistent with the values that attract many to visit Midway.

The land south of Memorial Hill, where two main roads meet, is a natural location for a hub supported by the MAC. It is easily identified by visitors and readily accessible through Memorial Hill Road or Main Street.

Events like Swiss Days and the Sheep Dog Trials have created thousands of ambassadors for Midway. The visitors feel as though they have gone to a foreign land and been greeted by gracious and welcoming residents. The design and character of the MAC will enhance the feel of escaping for a time to a foreign land.

While growth continues to be the topic of discussion among existing residents of Wasatch County, many of us believe that growth will occur overtime regardless of policy. Decision-makers have the unpopular job of ensuring that growth is consistent with the values and character of the community. Maintaining a defined city vision while bearing in mind inevitable growth is the responsibility of leaders. Attractive communities happen over time with visionary policies at the headwaters. Discord and contention within communities are avoided with a well-defined vision in place. As presented, the MAC can be a unifying vision for Midway City.

The MAC supports Midway City and the County in many positive ways. It creates ambassadors, represents our values, produces tax revenues, and maintains the Swiss/European theme.

Respectfully,

Michael Nelson

This is Nancy Norton

I'm sending you a note regarding the high valley arts program. You were so very helpful getting me the tickets for 7 brides for 7 brothers  
You asked for a short note from our group. Hope this works. And feel free to edit.

Our group from Palm Desert, ca have been coming to Park City for many years. One of our favorite activities has been the Summer High Valley Arts play in Midway.. We started with 8 of us and what a shock when we realized that we were in a **LARGE** field, watching the most wonderful play by extremely talented people. Every year since our group has grown and we're now up to 22. It is one of the highlights of the summer for ALL of us Thank you High Valley Arts Especially. Sue and Stewart

ZERMATT UTAH

May 12, 2021

**TO WHOM IT MAY CONCERN**  
**SUPPORT FOR A PERFORMING ARTS CENTER IN MIDWAY CITY**

I can only speak directly for Zermatt, but I believe my views accurately represent the resort operators which are the largest private employers in Midway and the Heber Valley.

Is there a need for a viable performing arts center in Midway? The answer is an unequivocal, yes. Should the PAC be located at the proposed site within the European Village concept on the Main Street side of Memorial Hill? The answer is an unequivocal, yes.

This initiative will provide a significant contribution to the viability of Midway City's entire economy, including the resorts.

It must be common knowledge — certainly in Council circles — that Midway's two major resorts have been struggling for years to maintain profitability. This is largely due to the lack of destination amenities in Midway. The destination-quality PAC will certainly attract many new overnight stays, helping to bridge the occupancy gap. Yes, there will be more day visitors too, but overnight stays in hotels have a demonstrable impact on increased spending at other local venues. The PAC means an improved tax base for Midway City, along with an energetic uplift to the local entertainment and retail scene.

I would be happy to discuss the PAC in the context of its economic impact on the resorts and Midway City in more detail at any time, with Council members, or with other interested parties.

Very truly yours,

Peter R. Rancie

Midway City Council

Dear Midway City Council and City Leaders,

We are writing to express our support of the Midway Arts Council to build the Performing Arts Center to be located at the base of Memorial Hill on Main Street.

We feel it would greatly benefit the Midway Community and create a cultural destination to have such a fine Arts Center in the valley. We need a lot of visitors to come to Midway. Having this Arts Center will give them another activity to do while visiting and it will help drive our economy and create more tax base.

Sincerely,

Russ and Diane Watts  
RKW/mf

To Whom It May Concern:

May 17, 2021

Re: Midway Arts Center

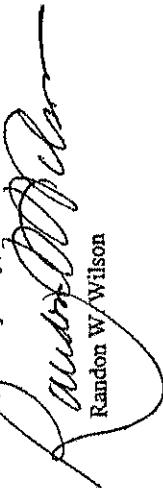

Gayle and I built a 2<sup>nd</sup> home in Midway Farms on Farm Road in 1978 and we moved here full time in 1999. We served on Midway Boosters for six (6) years, organized Midway Heritage Foundation, started the Midway Swiss Days Pin Collection, and were recognized as Midway honored citizens in 2014.

We love Midway and our family recognizes it as our "homestead". We understand the issues of growth, taxation, infrastructure and the importance of making "ends meet." We especially appreciate the visitors who come here to stay at our resorts and other places of lodging as they bring revenue without stressing the infrastructure.

We have long appreciated the performing arts and other arts groups for the quality of life that they bring and we hope that we will be able to construct facilities that will help them remain an enduring legacy for Midway.

We are strongly in favor of the proposed Midway Art Center to be constructed south of Memorial Hill as part of a mixed use development that will perpetuate the performing arts and preserve open space while at the same time attracting visitors who will contribute to our economic well being. We understand that traffic patterns and other issues will have to be dealt with, but we are confident that our leaders will be able to do so. It is our hope that Midway City Council will recognize the substantial benefits that will come to Midway through the Midway Arts Center.

Yours very truly,

Randon W. Wilson

JOHN H. & HOLLY ZENGER  
275 LUZERN RD.  
P.O. BOX 1268  
MIDWAY, UT 84049

To Whom It May Concern:  
May 19, 2021

Concerning the proposed Midway Arts Center

We have lived in Midway since 1995 when we occupied our current home. We have attempted to be good citizens of this community through serving on the Booster Board for several terms and functioning in various leadership roles. Holly initiated the public, interfaith displays of Nativity scenes; which have contributed to the culture and traditions of the community.

The community is fortunate to have many talented people who are dedicated to the performing arts. We are aware that there is a group seeking to spearhead the construction of a performing arts center that could permanently provide an excellent performance venue, as well as rehearsal facilities it would be available to a variety of musical and artistic groups who will benefit from a well-designed and equipped facility. Modern lighting and sound systems greatly enhance these performances. These performing groups and the physical building that would support this endeavor will combine to attract visitors, and make the community an even more attractive home for all residents.

We support the location on the Main Street side of Memorial Hill. It provides accessibility and visibility for this arts center. We do not believe it detracts from the worthy purpose or message that Memorial Hill offers.

We encourage the elected leaders of our community to support to the groups that are working hard to make this happen. We are aware that there are many worthy causes and projects seeking your backing. At the same time, we think these performing groups bring a vibrant and unique dimension to our community. We hope this will be part of the legacy for which you will be remembered.

Warm regards,

John H. Zenger

Holly Zenger

Midway, Utah  
CMT Project No. 18372

Mr. Waldrip:

Submitted herewith is the report of our geotechnical engineering study for the subject site. This report contains the results of our findings and an engineering interpretation of the results with respect to the available project characteristics. It also contains recommendations to aid in the design and construction of the earth related phases of this project.

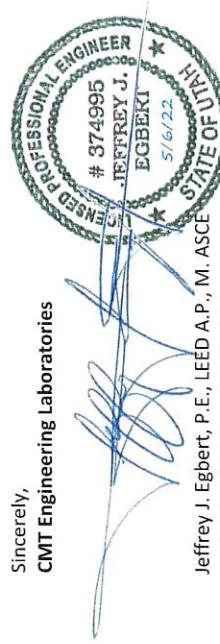

On April 28, 2022, a CMT Technical Services (CMT) staff professional was on-site and supervised the excavation of 4 test pits extending to depths of about 1.5 to 3.0 feet below the existing ground surface where excavator refusal occurred on bedrock. We obtained samples of the soils overlying the bedrock during the field operations that we subsequently transported to our laboratory for further testing and observation.

Conventional spread and/or continuous footings may be utilized to support the proposed structure, provided the recommendations in this report are followed. This report presents detailed discussions of design and construction criteria for this site.

We appreciate the opportunity to work with you at this stage of the project. CMT offers a full range of Geotechnical Engineering, Geological, Material Testing, Special Inspection services, and Phase I and II Environmental Site Assessments. With offices throughout Utah, Idaho, Arizona, Colorado and Texas, our staff is capable of efficiently serving your project needs. If we can be of further assistance or if you have any questions regarding this project, please do not hesitate to contact us at 801-492-4132.

Sincerely,  
CMT Engineering Laboratories

## 1.0 INTRODUCTION

### 1.1 General

CMT Technical Services (CMT) was retained to conduct a geotechnical subsurface study for the proposed construction of a performing arts center. The site consists of two existing residential lots located on the south side of Main Street and 330 and 368 East in Midway, Utah, as shown in the **Vicinity Map** below.

### 1.2 Objectives, Scope and Authorization

The objectives and scope of our study were planned in discussions between Mr. Michael Johnston of Summit Engineering Group, Inc., and Mr. Jeff Egbert of CMT. In general, the objectives of this study were to define and evaluate the subsurface soil and groundwater conditions at the site, and provide appropriate foundation, earthwork, pavement and seismic recommendations to be utilized in the design and construction of the proposed development.

In accomplishing these objectives, our scope of work included performing field exploration, which consisted of the excavating/logging/sampling of 4 test pits, performing laboratory testing on representative samples of the subsurface soils collected in the test pits, and conducting an office program, which consisted of correlating

available data, performing engineering analyses, and preparing this summary report. This scope of work was authorized by returning a signed copy of our proposal dated and executed on April 22, 2022.

### **1.3 Description of Proposed Construction**

We understand that the proposed structure will be a two story performing arts center which we project will be of conventional wood frame or light steel frame construction supported on concrete footings with a floor slab established at or near the existing site grade. We project that maximum structural loads for the center will be on the order of 8,000 pounds per linear foot for walls, 100,000 pounds for columns, and relatively light floor slab loads having an average uniform loading not exceeding 100 pounds per square foot. If the structural loading conditions are different than we have projected, please notify us so that any appropriate modifications to our conclusions and recommendations contained herein can be made.

We also understand that pavements at the site will include light-duty parking areas which we anticipate will utilize asphalt surfacing. Traffic is projected to consist of mostly automobiles and light trucks, a few medium-weight delivery trucks, a weekly garbage truck, and an occasional fire truck.

Site development will require removal of existing structures and some earthwork in the form of minor cutting and filling. A site grading plan was not available at the time of this report, but we project that maximum cuts and fills may be on the order of 2 to 3 feet. If deeper cuts or fills are planned, CMT should be notified to provide additional recommendations, if needed.

### **1.4 Executive Summary**

The proposed structure can be supported upon conventional spread and continuous wall foundations. The most significant geotechnical aspects regarding site development include the following:

1. Approximately 6 inches of topsoil on the surface, which will require removal beneath the structure and pavements;
2. Near surface soils consist of CLAY (CL) and SAND (SC-SM) extending about 1.5 to 2.0 below the existing site grade where bedrock was encountered, and upon which excavator refusal occurred at 1.5 to 3.0 feet below the surface;
3. Groundwater was not encountered within the depths explored; and
4. Foundations and floor slabs may be placed on entirely on suitable, undisturbed natural soils, entirely on structural fill extending to suitable, undisturbed natural soils or bedrock, or entirely on competent bedrock.

CMT must assess that topsoil, undocumented fills (if encountered), debris, disturbed or unsuitable soils have been removed and that suitable soils have been encountered prior to placing site grading fills, footings, slabs, and pavements.

In the following sections, detailed discussions pertaining to the site are provided, including subsurface descriptions, geologic/seismic setting, earthwork, foundations, lateral resistance, lateral pressure, floor slabs, and pavements.

## 2.0 FIELD EXPLORATION

### 2.1 General

In order to define and evaluate the subsurface soil and groundwater conditions, 4 test pits were excavated with a backhoe at the site to depths of approximately 1.5 to 3.0 feet below the existing ground surface where excavator refusal occurred on bedrock (tufa). Locations of the test pits are shown on **Figure 1, Site Plan**, included in the Appendix. The field exploration was performed under the supervision of an experienced member of our geotechnical staff.

Representative samples of the soils overlying the bedrock were collected by obtaining disturbed "grab" samples from within each test pit. The samples were sealed in plastic bags prior to transport to the laboratory.

The subsurface soils encountered in the test pits were classified in the field based upon visual and textural examination, logged and described in general accordance with ASTM<sup>1</sup> D-2488. These field classifications were supplemented by subsequent examination and testing of select samples in our laboratory. Graphical representations of the subsurface conditions encountered are presented on each individual Test Pit Log, **Figures 2 through 5**, included in the Appendix. A Key to Symbols defining the terms and symbols used on the logs, is provided as **Figure 6** in the Appendix.

Upon completion of logging and sampling, the test pits were backfilled with the excavated soils. When backfilling, minimal to no effort was made to compact the backfill and no compaction testing was performed. Thus, the test pit backfill is considered undocumented fill and settlement of the backfill in the test pits over time should be anticipated.

### 2.2 Infiltration Testing

We also performed infiltration testing as part of our field exploration within test pit TP-3 at a depth of about 1 foot below the existing ground surface. The testing consisted of creating and filling a small hole at that depth with water, and measuring the rate of water drop within the small hole over a certain time period. We repeated this process multiple times. The results of this test indicate that the silty sand soils at this site have an infiltration rate of approximately 2 minutes per inch. This rate could increase (become slower) over time due to siltation, thus we recommend an appropriate factor of safety be applied for design.

However, with the shallow bedrock, using sumps for collecting and discharging of runoff water into the underlying soils is likely not practical, unless deep sumps/wells are drilled.

<sup>1</sup>American Society for Testing and Materials

## 3.0 LABORATORY TESTING

Selected samples of the subsurface soils were subjected to various laboratory tests to assess pertinent engineering properties, as follows:

1. Moisture Content, ASTM D-2216, Percent moisture representative of field conditions
2. Atterberg Limits, ASTM D-4318, Plasticity and workability
3. Gradation Analysis, ASTM D-1140/C-117, Grain Size Analysis

Laboratory test results are presented on the test pit logs (*Figures 2 through 5*) and in the following **Lab Summary Table**:

LAB SUMMARY TABLE

TEST PIT	DEPTH (feet)	SOIL CLASS	SAMPLE TYPE	MOISTURE CONTENT(%)	GRADATION			ATTERBERG LIMITS		
					GRAV.	SAND	FINES	LL	PL	PI
TP-1	1	CL	Grab	7				33	21	12
TP-3	1.5	SC-SM	Grab	18				39		
TP-4	1	SC-SM	Grab	11				14		

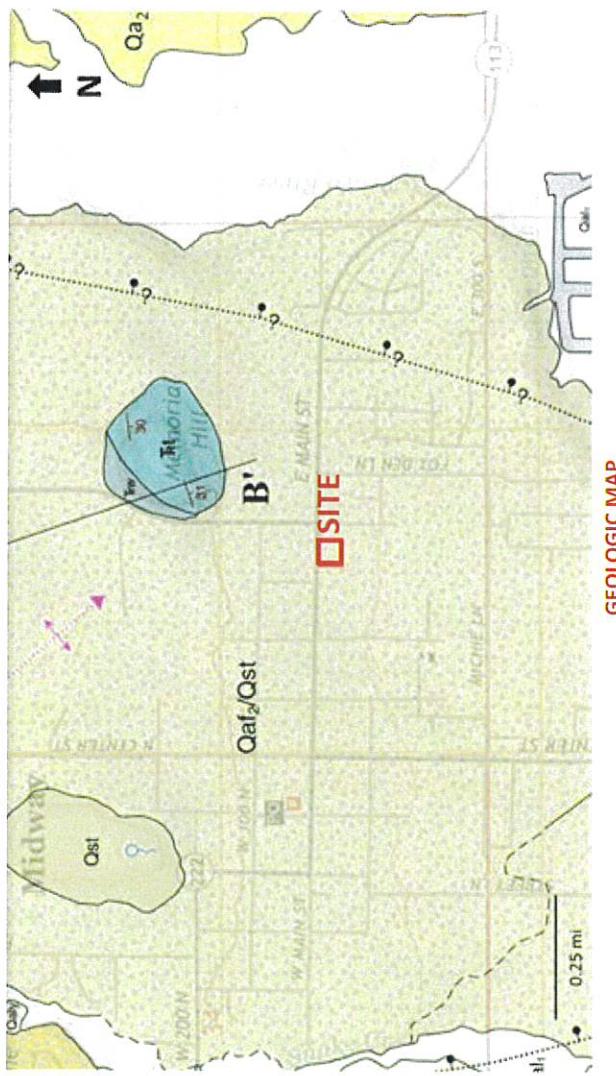

## 4.0 GEOLOGIC & SEISMIC CONDITIONS

### 4.1 Geologic Setting

The subject site is located in the west-central portion of the Heber Valley, part of the Wasatch Hinterlands Section of the Middle Rocky Mountain Physiographic Province of north-central Utah. The Wasatch Hinterlands are described by Stokes<sup>2</sup> as “a belt of mixed, moderately rugged topography” located between the Wasatch Mountains to the west and the Uinta Mountains to the east. Stokes further describes the area as having “varied and unorganized topography with hilly areas dominating valley areas.” The site sits at an elevation of between approximately 5,574 and 5,571 feet above sea level with lower elevation towards the south. The Heber Valley is believed to have been formed by late Tertiary normal faulting associated with Miocene to recent extension of the Basin and Range Physiographic Province to the west. These valley-forming faults are now considered to be inactive (no evidence of movement during the past 10,000 years). During Quaternary time the valley has been subject to both erosional and depositional processes associated with the Provo River and its tributaries. During Quaternary time, the Midway area, including the location of the target property has also been impacted by hydrothermal spring activity. These spring waters have deposited layers of carbonate rock called tufa throughout much of the northwest portion of Heber Valley in the Midway area.

<sup>2</sup>Stokes, W.L., 1985, *Geology of Utah*; Utah Museum of Natural History, University of Utah, and Utah Geological and Mineral Survey, Department of Natural Resources, p. 243

The geology of USGS Heber City, Utah 7.5 Minute Quadrangle, which includes the location of the subject site, has been mapped by Bielek<sup>3</sup>. The surficial geology at the subject site is mapped as “Middle fan alluvium over calcareous spring tufa deposit” (Map Unit Qaf<sub>2</sub>/Qst) dated Holocene to upper Pleistocene. Unit Qaf<sub>2</sub>/Qst is described in the referenced map as “Middle fan alluvium that forms a veneer over and interfingers with calcareous spring tufa deposits in the Midway area; forms a surface of slightly lower elevation with fewer tufa exposures than adjacent Qaf<sub>0</sub>/Qst deposits; tufa is pale grayish yellow, weathers light brown, and is highly porous and vuggy; tufa is exposed at and near mapped springs and likely underlies much of the surrounding surface where it is concealed by and interbedded with fan alluvium; tufa, interbedded with basin-fill sediments, is reported to depths of nearly 170 feet (52 m) in monitoring wells (Wallace, 2005) and to 392 feet (120 m) in a water well (Mayo and others, 2005) near the Midway fish hatchery immediately south of the map area.” Refer to the **Geologic Map**, shown below.

#### 4.2 Faulting

No active surface fault rupture traces are mapped crossing, adjacent to, or projecting toward the site on the referenced geologic map. The nearest mapped active fault is the Provo section of the Wasatch Fault Zone approximately 15.5 miles west of the site<sup>4</sup>.

<sup>3</sup> Robert F. Bielek, 2019, Interim Geologic Map of the Heber City Quadrangle, Summit and Wasatch Counties, Utah. OFR-712dm. UGS. 1:24,000 scale.

<sup>4</sup> Utah Quaternary Fault & Fold Map, Utah Geological Survey: <https://geology.utah.gov/apps/qfaults/>

## **4.3 Seismicity**

### **4.3.1 Site Class**

Utah has adopted the International Building Code (IBC) 2018, which determines the seismic hazard for a site based upon 2014 mapping of bedrock accelerations prepared by the United States Geologic Survey (USGS) and the soil site class. The USGS values are presented on maps incorporated into the IBC code and are also available based on latitude and longitude coordinates (grid points). For site class definitions, IBC 2018 Section 1613.2.2 refers to Chapter 20, Site Classification Procedure for Seismic Design, of ASCE<sup>5</sup> 7-16, which stipulates that the average values of shear wave velocity, blow count and/or shear strength within the upper 100 feet (30 meters) be utilized to determine seismic site class.

Considering our explorations only extended to a maximum depth of about 3 feet and that shallow bedrock was encountered, it is our opinion the site best fits Site Class B – Rock Profile (estimated), which we recommend for seismic structural design.

### **4.3.2 Ground Motions**

The 2014 USGS mapping utilized by the IBC provides values of peak ground, short period and long period spectral accelerations for the Site Class B/C boundary and the Risk-Targeted Maximum Considered Earthquake (MCE<sub>R</sub>). This Site Class B/C boundary represents average bedrock values for the Western United States and must be corrected for local soil conditions. The table and response spectra on the following page summarizes the peak ground, short period and long period accelerations for the MCE<sub>R</sub> event, and incorporates appropriate soil correction factors for a Site Class B (estimated) soil profile at site grid coordinates of 40.5116 degrees north latitude and -111.4651 degrees west longitude:

SPECTRAL ACCELERATION PERIOD, T	SITE CLASS B/C BOUNDARY [Mapped values] (g)	SITE COEFFICIENT	SITE CLASS B* [adjusted for site class effects] (g)	MULTIPLIER	DESIGN VALUES (g)
Peak Ground Acceleration	PGA = <b>0.258</b>	$F_{Pga} = 1.000$	$PGA_M = 0.258$	1.000	$PGA_M = 0.258$
0.2 Seconds (Long Period Acceleration)	$S_a = 0.585$ (no exceptions needed)	$F_a = 1.000$	$S_{aNS} = 0.585$ $S_{aNS} = (N/A)$	0.667	$S_{aS} = 0.390$ $S_{aS} = (N/A)$
1.0 Second (Long Period Acceleration)	$S_1 = 0.208$ (no exceptions needed)	$F_v = 1.000$	$S_{vM1} = 0.208$ $S_{vM1} = (N/A)$	0.667	$S_{v1} = 0.139$ $S_{v1} = (N/A)$

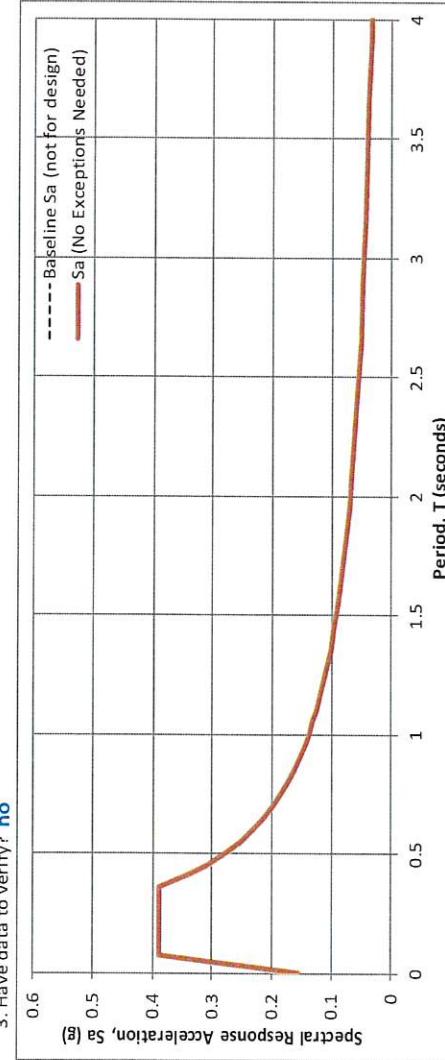

NOTES: 1. TL (seconds): **8**

2. Site Class: **B**

3. Have data to verify? **no**

\* Site Class B Without Measurements

4. No Exceptions Needed

#### 4.3.3 Liquefaction

Liquefaction is defined as the condition when saturated, loose, sandy soils lose their support capabilities because of excessive pore water pressure which develops during a seismic event. Clayey soils, even if saturated, will generally not liquefy during a major seismic event.

A special liquefaction study was not performed for this site. We encountered unsaturated, clay and clayey sand overlying shallow bedrock. In our opinion, the soils we encountered have a very low liquefaction potential.

#### 4.4 Other Geologic Hazards

No landslide deposits or features, including lateral spread deposits, are mapped on or adjacent to the site. The site is not located within a known or mapped debris flow, stream flooding<sup>6</sup>, or rock fall hazard area.

<sup>6</sup>Federal Emergency Management Agency:  
<https://msc.fema.gov/portal/search?AddressQuery=400%20East%20Main%20Street%2C%20Midway%2C%20Utah#searchresultsanc>

## 5.0 SITE CONDITIONS

### 5.1 Surface Conditions

At the time the test pits were excavated the site consisted of two adjacent residential lots. The western lot was occupied by an existing single family residence with shed in the southeast portion of the lot. A small shed occupied the eastern lot. Based upon aerial photos dating back to 1993 that are readily available on the internet, a residence previously occupied the eastern lot and was removed sometime between 2016 and 2017. The photos also indicate several mature trees were present around the existing residence on the western lot, which appear to have been removed between 2019 and 2021. Site grade slopes gently downward to the south. Vegetation consists of grasses and weeds. The site is bordered on the north by Main Street, on the south and east by commercial development, and on the west by a residence (see **Vicinity Map** in Section 1.1 above).

### 5.2 Subsurface Soils

At the locations of the test pits we encountered approximately 6 inches of topsoil at the surface. Natural soils observed beneath the topsoil consisted of slightly moist, medium stiff (estimated), brown CLAY (CL) on the north side of the site, grading to slightly moist, medium dense (estimated), brown Silty-Clayey SAND (SC-SM) ,on the south side of the site, extending to depths of 1.5 to 2.0 feet below the existing ground surface where bedrock (tufa) was encountered. We attempted to excavate into the bedrock at the locations of test pits TP-3 and TP-4 and were only able to excavate an additional 6 to 12 inches into the rock before excavator refusal occurred.

For a more descriptive interpretation of subsurface conditions, please refer to the test pit logs, **Figures 2 through 5**, which graphically represent the subsurface conditions encountered. The lines designating the interface between soil types on the logs generally represent approximate boundaries - *in situ*, the transition between soil types may be gradual.

### 5.3 Groundwater

We did not encounter groundwater at the time of our field explorations within the maximum depth explored of about 3 feet below the existing ground surface. Therefore, we do not anticipate that groundwater will affect the proposed construction.

Groundwater levels can fluctuate seasonally. Numerous other factors such as heavy precipitation, irrigation of neighboring land, and other unforeseen factors, may also influence ground water elevations at the site. The detailed evaluation of these and other factors, which may be responsible for ground water fluctuations, and the magnitude of potential fluctuations, is beyond the scope of this study.

### 5.4 Site Subsurface Variations

Based on the results of the subsurface explorations and our experience, variations in the continuity and nature of subsurface conditions should be anticipated. Due to the heterogeneous characteristics of natural soils, care

should be taken in interpolating or extrapolating subsurface conditions between or beyond the exploratory locations.

Also, after completing the logging and sampling, the test pits were backfilled with the excavated soils but minimal to no effort was made to compact these soils. Thus, the test pit backfill is considered undocumented fill and settlement of the backfill in the test pits over time should be anticipated.

## 6.0 SITE PREPARATION AND GRADING

### 6.1 General

We understand any existing structures on the site will be razed and removed. We anticipate the existing and previous residences do/did not have a basement. Removal should also include any existing underground utilities that will be abandoned. Resulting excavations should be backfilled with properly compacted structural fill.

All deleterious materials should be stripped from the site prior to commencement of construction activities. This includes vegetation, topsoil, loose and disturbed soils, etc. Based upon the conditions observed in the test pits there is topsoil on the surface of the site which we estimated to be about 6 inches in thickness. When stripping and grubbing, topsoil should be distinguished by the apparent organic content and not solely by color; thus we estimate that topsoil stripping will need to include the upper 4 inches.

Site clearing and grubbing should be observed by a CMT geotechnical engineer to assess that suitable natural soils have been exposed and any deleterious materials, loose and/or disturbed soils have been removed, prior to placing site grading fills, footings, slabs, or pavements.

Fill placed over large areas to raise overall site grades can induce settlements in the underlying natural soils. If more than 3 feet of site grading fill is anticipated over the natural ground surface, we should be notified to assess potential settlements and provide additional recommendations as needed. These recommendations may include placement of the site grading fill far in advance to allow potential settlements to occur prior to construction.

### 6.2 Temporary Excavations

Groundwater was not encountered within the depths explored, about 1.5 to 3.0 feet at the time of our field explorations, and thus is not anticipated to be encountered in excavations.

In clayey (cohesive) soils, temporary construction excavations not exceeding 4 feet in depth may be constructed with near-vertical side slopes. Temporary excavations up to 8 feet deep, above or below groundwater, may be constructed with side slopes no steeper than one-half horizontal to one vertical (0.5H:1V).

For sandy/gravelly (cohesionless) soils, temporary construction excavations not exceeding 4 feet in depth should be no steeper than one-half horizontal to one vertical (0.5H:1V). For excavations up to 8 feet and above groundwater, side slopes should be no steeper than one horizontal to one vertical (1H:1V). Excavations

encountering saturated cohesionless soils will be very difficult to maintain, and will require very flat side slopes and/or shoring, bracing and dewatering.

All excavations must be inspected periodically by qualified personnel. If any signs of instability or excessive sloughing are noted, immediate remedial action must be initiated. All excavations should be made following OSHA safety guidelines.

### **6.3 Fill Material**

Following are our recommendations for the various fill types we anticipate will be used at this site:

FILL MATERIAL TYPE	DESCRIPTION   RECOMMENDED SPECIFICATION
Structural Fill	Placed below structures, flatwork and pavement. Well-graded sand/gravel mixture, with maximum particle size of 4 inches, a minimum 70% passing 3/4-inch sieve, a maximum 20% passing he No. 200 sieve, and a maximum Plasticity Index of 10.
Site Grading Fill	Placed over larger areas to raise the site grade. Sandy to gravelly soil, with a maximum particle size of 6 inches, a minimum 70% passing 3/4-inch sieve, a maximum 50% passing No. 200 sieve, and a maximum Plasticity Index of 15.
Non-Structural Fill	Placed below non-structural areas, such as landscaping. On-site soils or imported soils, with a maximum particle size of 8 inches, including silt/clay soils not containing excessive amounts of degradable/organic material (see discussion below).
Stabilization Fill	Placed to stabilize soft areas prior to placing structural fill and/or site grading fill. Coarse angular gravels and cobbles 1 inch to 8 inches in size. May also use 1.5-inch to 2.0-inch gravel placed on stabilization fabric, such as Mirafi R280i, or equivalent (see <b>Section 6.6</b> ).

On-site sand soils do not appear suitable for use as structural fill, but may be used as site grading fill and non-structural fill.

On-site clay soils are not suitable for use as structural fill, but may be used as site grading fill and non-structural fill. Note that these clay soils are moisture-sensitive, which means they are inherently more difficult to work with in proper moisture conditioning (they are very sensitive to changes in moisture content), requiring very close moisture control during placement and compaction. This will be very difficult, if not impossible, during wet and cold periods of the year. We also recommend the site grading fill thickness using on-site clay soils not exceed a maximum of 3 feet below structures, to minimize potential settlements.

All fill material should be approved by a CMT geotechnical engineer prior to placement.

### **6.4 Fill Placement and Compaction**

The various types of compaction equipment available have their limitations as to the maximum lift thickness that can be compacted. For example, hand operated equipment is limited to lifts of about 4 inches and most “trench compactors” have a maximum, consistent compaction depth of about 6 inches. Large rollers, depending on soil and moisture conditions, can achieve compaction at 8 to 12 inches. The full thickness of each lift should

be compacted to at least the following percentages of the maximum dry density as determined by ASTM D-1557 (or AASHTO<sup>7</sup> T-180) in accordance with the following recommendations:

LOCATION	TOTAL FILL THICKNESS (FEET)	MINIMUM PERCENTAGE OF MAXIMUM DRY DENSITY
Beneath an area extending at least 4 feet beyond the perimeter of structures, and below flatwork and pavement (applies to structural fill and site grading fill) extending at least 2 feet beyond the perimeter	0 to 5	95
Site grading fill outside area defined above	0 to 5	92
Utility trenches within structural areas	--	96
Roadbase and subbase	-	96
Non-structural fill	0 to 5	90

Structural fills greater than 5 feet thick are not anticipated at the site. For best compaction results, we recommend that the moisture content for structural fill/backfill be within 2% of optimum. Field density tests should be performed on each lift as necessary to verify that proper compaction is being achieved.

## 6.5 Utility Trenches

For the bedding zone around the utility, we recommend utilizing sand bedding fill material that meets current APWA<sup>8</sup> requirements.

All utility trench backfill material below structurally loaded facilities (foundations, floor slabs, flatwork, parking lots/drive areas, etc.) should be placed at the same density requirements established for structural fill in the previous section.

Most utility companies and local governments are requiring Type A-1a or A-1b (AASHTO Designation) soils (sand/gravel soils with limited fines) be used as backfill over utilities within public rights of way, and the backfill be compacted over the full depth above the bedding zone to at least 96% of the maximum dry density as determined by AASHTO T-180 (ASTM D-1557).

Where the utility does not underlie structurally loaded facilities and public rights of way, natural soils may be utilized as trench backfill above the bedding layer, provided they are properly moisture conditioned and compacted to the minimum requirements stated above in Section 6.4.

<sup>7</sup> American Association of State Highway and Transportation Officials  
<sup>8</sup> American Public Works Association

## **6.6 Stabilization**

The natural soils at this site will likely be susceptible to rutting and pumping. The likelihood of disturbance or rutting and/or pumping of the existing natural soils is a function of the soil moisture content, the load applied to the surface, as well as the frequency of the load. Consequently, rutting and pumping can be minimized by avoiding concentrated traffic, minimizing the load applied to the surface by using lighter equipment and/or partial loads, by working in drier times of the year, or by providing a working surface for the equipment. Rubber-tired equipment particularly, because of high pressures, promotes instability in moist/wet, soft soils.

If rutting or pumping occurs, traffic should be stopped and the disturbed soils should be removed and replaced with stabilization material. Typically, a minimum of 18 inches of the disturbed soils must be removed to be effective. However, deeper removal is sometimes required.

To stabilize soft subgrade conditions (if encountered), a mixture of coarse, clean, angular gravels and cobbles and/or 1.5- to 2.0-inch clean gravel should be utilized, as indicated above in **Section 6.3**. Often the amount of gravelly material can be reduced with the use of a geotextile fabric such as Mirafit RS280i or equivalent. Its use will also help avoid mixing of the subgrade soils with the gravelly material. After excavating the soft/disturbed soils, the fabric should be spread across the bottom of the excavation and up the sides a minimum of 18 inches. Otherwise, it should be placed in accordance with the manufacturer's recommendation, including proper overlaps. The gravel material can then be placed over the fabric in compacted lifts as described above.

## **7.0 FOUNDATION RECOMMENDATIONS**

The following recommendations have been developed on the basis of the previously described project characteristics, including the maximum loads discussed in **Section 1.3**, the subsurface conditions observed in the field and the laboratory test data, and standard geotechnical engineering practice.

### **7.1 Foundation Recommendations**

Based on our geotechnical engineering analyses, the proposed structure may be supported upon conventional spread and/or continuous wall foundations placed entirely on suitable, undisturbed natural soils, entirely on structural fill extending to suitable natural soils or competent bedrock, or entirely on competent bedrock. Footings may be designed using a net bearing pressure of 2,000 psf if placed on suitable, undisturbed, natural soils or 2,500 psf if placed on a minimum 18 inches of structural fill extending to suitable natural soils, or 3,000 psf if placed on structural fill extending to bedrock or if placed on the bedrock.

The term "net bearing pressure" refers to the pressure imposed by the portion of the structure located above lowest adjacent final grade, thus the weight of the footing and backfill to lowest adjacent final grade need not be considered. The allowable bearing pressure may be increased by 1/3 for temporary loads such as wind and seismic forces.

We also recommend the following:

1. Exterior footings subject to frost should be placed at least 36 inches below final grade.
2. Interior footings not subject to frost should be placed at least 16 inches below grade.
3. Continuous footing widths should be maintained at a minimum of 18 inches.
4. Spot footings should be a minimum of 24 inches wide.

### **7.2 Installation**

Under no circumstances shall foundations be placed on undocumented fill (if encountered), topsoil with organics, sod, rubbish, construction debris, other deleterious materials, frozen soils, or within ponded water. If other unsuitable soils are encountered, they must be completely removed and replaced with properly compacted structural fill. Deep, large roots may be encountered where trees and larger bushes are located or were previously located at the site; such large roots should be removed.

Also, to reduce the potential for differential settlement we recommend that foundations be placed on uniform soils and not on combinations such as party on natural soils and party on structural fill, or party on structural fill and partly on bedrock.

The base of footing excavations should be observed by a CMT geotechnical engineer to assess if suitable bearing soils have been exposed.

All structural fill should meet the requirements for such, and should be placed and compacted in accordance with **Section 6** above. The width of structural replacement fill below footings should be equal to the width of the footing plus 1 foot for each foot of fill thickness. For instance, if the footing width is 2 feet and the structural fill depth beneath the footing is 2 feet, the fill replacement width should be 4 feet, centered beneath the footing.

The minimum thickness of structural fill below footings should be equivalent to one-third the thickness of structural fill below any other portion of the foundations. For example, if the maximum depth of structural fill is 6 feet, all footings for the new structure should be underlain by a minimum 2 feet of structural fill.

### **7.3 Estimated Settlement**

Foundations designed and constructed in accordance with our recommendations could experience some settlement, but we anticipate that total settlements of footings founded as recommended above will not exceed 1 inch, with differential settlements on the order of 0.5 inches over a distance of 25 feet. We expect approximately 50% of the total settlement to initially take place during construction.

### **7.4 Lateral Resistance**

Lateral loads imposed upon foundations due to wind or seismic forces may be resisted by the development of passive earth pressures and friction between the base of the footings and the supporting soils. In determining frictional resistance, a coefficient of 0.30 for natural soils or 0.40 for structural fill, and 0.45 for bedrock, may be

utilized for design. Passive resistance provided by properly placed and compacted existing natural soils above the water table may be considered equivalent to a fluid with a density of 350 pcf. A combination of passive earth resistance and friction may be utilized if the friction component of the total is divided by 1.5.

## 8.0 LATERAL EARTH PRESSURES

The lateral earth pressure values given below anticipate that existing natural soils will be used as backfill material, placed and compacted in accordance with the recommendations presented herein. If other soil types will be used as backfill, we should be notified so that appropriate modifications to these values can be provided, as needed.

The lateral pressures imposed upon subgrade facilities will depend upon the relative rigidity and movement of the backfilled structure. Following are the recommended lateral pressure values, which also assume that the soil surface behind the wall is horizontal and that the backfill within 3 feet of the wall will be compacted with hand-operated compacting equipment.

CONDITION	STATIC (psf/ft)*	SEISMIC (psf)*
Active Pressure (wall is allowed to yield, i.e. move away from the soil, with a minimum 0.001H movement/rotation at the top of the wall, where "H" is the total height of the wall)	40	11
At-Rest Pressure (wall is not allowed to yield)	60	N/A
Passive Pressure (wall moves into the soil)	350	65

\*Equivalent Fluid Pressure (applied at 1/3 Height of Wall)  
\*Equivalent Fluid Pressure (added to static and applied at 1/3 Height of Wall)

## 9.0 FLOOR SLABS

Floor slabs may be established entirely upon suitable, undisturbed, natural soils, or entirely on structural fill extending to suitable natural soils or bedrock (same as for foundations). Under no circumstances shall floor slabs be established directly on any topsoil, undocumented fills, loose or disturbed soils, sod, rubbish, construction debris, other deleterious materials, frozen soils, or within ponded water.

In order to facilitate curing of the concrete, we recommend that floor slabs be directly underlain by at least 4 inches of "free-draining" fill, such as "pea" gravel or 3/4-inch to 1-inch minus, clean, gap-graded gravel. To help control normal shrinkage and stress cracking, the floor slabs should have the following features:

1. Adequate reinforcement for the anticipated floor loads with the reinforcement continuous through interior floor joints;
2. Frequent crack control joints; and
3. Non-rigid attachment of the slabs to foundation walls and bearing slabs.

## 10.0 DRAINAGE RECOMMENDATIONS

It is important to the long-term performance of foundations and floor slabs that water not be allowed to collect near the foundation walls and infiltrate into the underlying soils. We recommend the following:

1. All areas around the structure should be sloped to provide drainage away from the foundations. We recommend a minimum slope of 4 inches in the first 10 feet away from the structure. This slope should be maintained throughout the lifetime of the structure.
2. All roof drainage should be collected in rain gutters with downspouts designed to discharge at least 10 feet from the foundation walls or well beyond the backfill limits, whichever is greater.
3. Adequate compaction of the foundation backfill should be provided. We suggest a minimum of 90% of the maximum laboratory density as determined by ASTM D-1557. Water consolidation methods should not be used under any circumstances.
4. Landscape sprinklers should be aimed away from the foundation walls. The sprinkling systems should be designed with proper drainage and be well-maintained. Over watering should be avoided.
5. Other precautions that may become evident during construction.

## 11.0 PAVEMENTS

All pavement areas must be prepared as discussed above in **Section 6.1**. Under no circumstances shall pavements be established over topsoil, undocumented fills (if encountered), loose or disturbed soils, sod, rubbish, construction debris, other deleterious materials, frozen soils, or within ponded water.

In pavement areas, subsequent to stripping and prior to the placement of pavement materials, the exposed subgrade must be proof rolled by passing moderate-weight rubber tire-mounted construction equipment over the surface at least twice. If excessively soft or otherwise unsuitable soils are encountered, we recommend they be removed to a minimum of 18 inches below the subgrade level and replaced with structural fill.

We anticipate the natural clay soils will exhibit poor pavement support characteristics when saturated or nearly saturated. Based on our laboratory testing experience with similar soils, our pavement design utilized a California Bearing Ratio (CBR) of 3 for the natural clay soils.

Given the projected traffic as discussed above in **Section 1.3**, the following pavement sections are recommended for approximately 4 ESAL's (18-kip equivalent single-axle loads) per day:

MATERIAL	PAVEMENT SECTION THICKNESS (inches)
Asphalt	3
Road-Base	10
Subbase	0
Total Thickness	13
	15

Untreated base course (UTBC) should conform to city specifications, or to 1-inch-minus UDOT specifications for A-1-a/NP, and have a minimum CBR value of 70%. Material meeting our specification for structural fill can be used for subbase, as long as the fines content (percent passing No. 200 sieve) does not exceed 15%. Roadbase and subbase material should be compacted as recommended above in **Section 6.4**. Asphalt material generally should conform to APWA requirements, having a  $\frac{1}{2}$ -inch maximum aggregate size, a 75-gyration Superpave mix containing no more than 15% of recycled asphalt (RAP) and a PG58-28 binder.

For dumpster pads, we recommend a pavement section consisting of 6.5 inches of Portland cement concrete and 6 inches of aggregate base over properly prepared suitable natural subgrade or site grading structural fills extending to suitable natural soils. Dumpster pads constructed overlying undocumented fills must be heavily reinforced.

## 12.0 QUALITY CONTROL

We recommend that CMT be retained as part of a comprehensive quality control testing and observation program. With CMT on-site we can help facilitate implementation of our recommendations and address, in a timely manner, any subsurface conditions encountered which vary from those described in this report. Without such a program CMT cannot be responsible for application of our recommendations to subsurface conditions which may vary from those described herein. This program may include, but not necessarily be limited to, the following:

### 12.1 Field Observations

Observations should be completed during all phases of construction such as site preparation, foundation excavation, structural fill placement and concrete placement.

### 12.2 Fill Compaction

Compaction testing by CMT is required for all structural supporting fill materials. Maximum Dry Density (Modified Proctor, ASTM D-1557) tests should be requested by the contractor immediately after delivery of any fill materials. The maximum density information should then be used for field density tests on each lift as necessary to ensure that the required compaction is being achieved.

### **12.3 Excavations**

All excavation procedures and processes should be observed by a geotechnical engineer from CMT or their representative. In addition, for the recommendations in this report to be valid, all backfill and structural fill placed in trenches and all pavements should be density tested by CMT. We recommend that freshly mixed concrete be tested by CMT in accordance with ASTM designations.

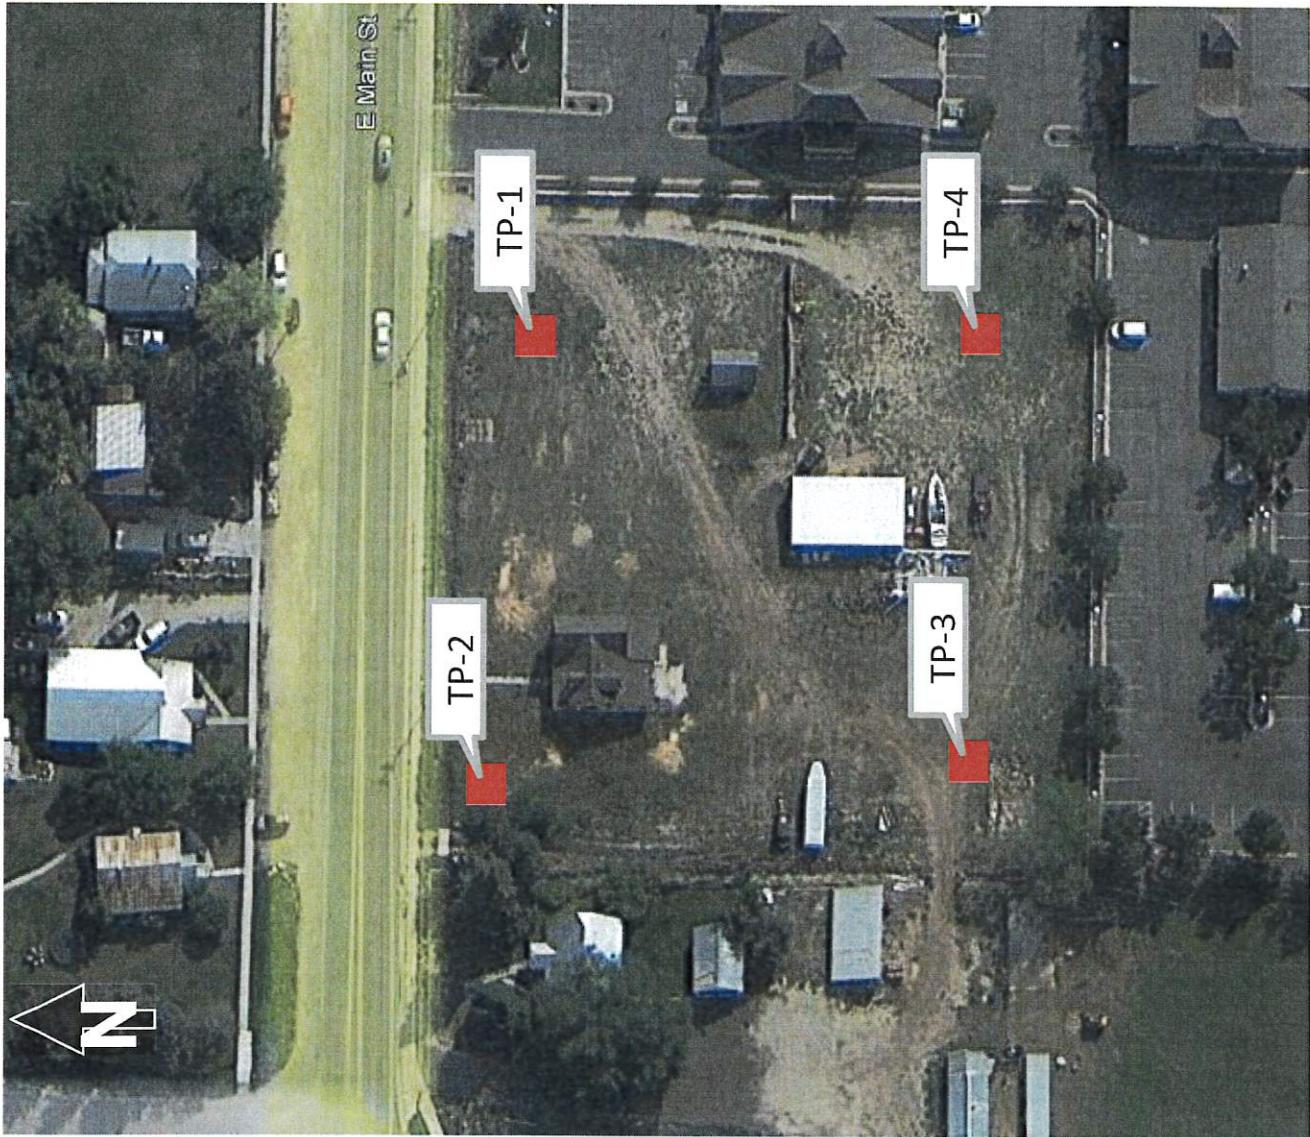

## **13.0 LIMITATIONS**

The recommendations provided herein were developed by evaluating the information obtained from the subsurface explorations and soils encountered therein. The exploration logs reflect the subsurface conditions only at the specific location at the particular time designated on the logs. Soil and ground water conditions may differ from conditions encountered at the actual exploration locations. The nature and extent of any variation in the explorations may not become evident until during the course of construction. If variations do appear, it may become necessary to re-evaluate the recommendations of this report after we have observed the variation.

Our professional services have been performed, our findings obtained, and our recommendations prepared in accordance with generally accepted geotechnical engineering principles and practices. This warranty is in lieu of all other warranties, either expressed or implied.

We appreciate the opportunity to be of service to you on this project. If we can be of further assistance or if you have any questions regarding this project, please do not hesitate to contact us at (801) 492-4132. To schedule materials testing, please call (801) 381-5141.

### Test Pit Log

TP-4

330-368 E. Main St., Midway, UT

Total Depth: 2' Water Depth: (see Remarks)

Date: 4/28/22 Job #: 18372

Depth (ft)	Soil Description	Gradation Atterberg							
		Dry Density (pcf)	Moisture (%)	Sample Type	Sample #	Sand %	Fines %	PL	LL
0	TOPSOIL: Brown silty sand, organics								
1 -	Silty-Clayey SAND (SM-SC), slightly moist, brown, roots BEDROCK: Petrock (Tuff), white								
2	EXCAVATOR REFUSAL ON BEDROCK AT 2.0 FEET

## Key to Symbols

Date: 4/28/22  
Job #: 18372

① Depth (ft)	②	③ Soil Description	COLUMN DESCRIPTIONS					
④ Sample Type #	⑤	⑥	⑦	⑧	⑨	Gradation	Atterberg	PI
Moisture (%)	Gravels %	Fines %	Sand %	Gravel %	Fines %	LL	PL	PI
Dry Density (pcf)	Dry Density (pcf)	Dry Density (pcf)	Dry Density (pcf)	Dry Density (pcf)	Dry Density (pcf)	LL	PL	PI
Sample Type	Sample Type	Sample Type	Sample Type	Sample Type	Sample Type	LL	PL	PI
⑩	⑪	⑫	⑬	⑭	⑮	⑯	⑰	⑱

**MAJOR DIVISIONS**

USCS SYMBOLS		② TYPICAL DESCRIPTIONS
CLEAN GRAVELS	GW	Well-Graded Gravels, Gravel-Sand Mixtures, Little or No Fines
GRAVELS (< 5% fines)	GP	Poorly-Graded Gravels, Gravel-Sand Mixtures, Little or No Fines
COARSE-GRAINED SOILS	GM	Silty Gravels, Gravel-Sand-Silt Mixtures
The coarse fraction retained on No. 4 sieve.	GC	Clayey Gravels, Gravel-Sand-Clay Mixtures
SANDS (> 12% fines)	SW	Well-Graded Sands, Gravelly Sands, Little or No Fines
SANDS WITH FINES	SP	Poorly-Graded Sands, Gravelly Sands, Little or No Fines
SANDS WITH FINES	SM	Silty Sands, Sand-Silt Mixtures
SANDS (> 12% fines)	SC	Clayey Sands, Sand-Clay Mixtures
FINE-GRAINED SOILS	ML	Inorganic Silts and Sandy Silts with No Plasticity or Clayey Silts with Slight Plasticity
More than 50% of material is larger than No. 200 sieve size.	CL	Inorganic Clays of Low to Medium Plasticity, Gravely Clays, Sandy Clays, Silty Clays, Lean Clays
SILTS AND CLAYS	OL	Organic Silts and Organic Silty Clays of Low Plasticity
Liquid Limit less than 50%	MH	Inorganic Silts, Micaceous or Detomacious Fine Sand or Silty Soils
SILTS AND CLAYS	CH	Inorganic Clays of High Plasticity, Fat Clays
Liquid Limit greater than 50%	OH	Organic Silts and Organic Clays of Medium to High Plasticity
HIGHLY ORGANIC SOILS	PT	Peat, Soils with High Organic Contents

**UNIFIED SOIL CLASSIFICATION SYSTEM (USCS)**

SAMPLER SYMBOLS		MODIFIERS	MOISTURE CONTENT
Block Sample	■	Trace	Dry: Absence of moisture, dusty, dry to the touch.
Bulk/Bag Sample	□	Some	Moist: Damp / moist to the touch, but no visible water.
Modified California Sampler	▣	5-12%	Wet: Visible water, usually soil below groundwater.
3.5" OD, 2.42" ID D&M Sampler	▢	With	
Rock Core	▢	> 12%	
Standard Penetration Split Spoon Sampler	▢		
Thin Wall (Shelby Tube)	▢		
WATER SYMBOL	▢		
Encountered Water Level	▢		
Measured Water Level	▢		(see Remarks on Logs)

**Note:** Dual Symbols are used to indicate borderline soil classifications (i.e. GP/GM, SC/SM, etc.).

- The results of laboratory tests on the samples collected are shown on the logs at the respective sample depths.
- The subsurface conditions presented on the logs are for the locations specified. Caution should be exercised if extrapolating beyond the exploration locations.
- The information presented on each log is subject to the limitations, conclusions, and recommendations presented in this report.
